

LIBERAL DEFEATS CULLE WITH MARGIN OF MORE THAN 500

Redistribution Bills in Committee

Four Seats Are Added To Alberta

Acadia, Athabasca, Camrose, Peace River, Vegreville, Wetaskiwin Included

STRATHCONA AND VICTORIA NOT ON LIST

Canada Will Have 245 Members Under the New Arrangement

OTTAWA, July 11.—(Canadian Press.)—The redistribution bill, with its definition of constituencies, is now before the House.

Referred to a special committee at the end of March, this measure has been the subject of arduous studies. Many differences of opinion have arisen in regard to it, and long and sometimes contentious discussions have raged about its details. Even now the report is not entirely unanimous. No minority report is presented but the report of the committee states explicitly that the members have been unable to agree on the redistribution of seats in the provinces of Ontario, Quebec, Saskatchewan, Western Territories, and the Yukon.

The committee was unanimous in the other provinces.

The report of the committee was held on the table in the House to-day. The committee's chairman, Mr. J. H. Macdonald, stated that the committee had been unable to agree on the redistribution of seats in the provinces of Ontario, Quebec, Saskatchewan, Western Territories, and the Yukon.

Hindu-Muslim Row Involves All Delhi: Seven Persons Killed

DELHI, British India, July 11.—Seven persons were reported killed today in a riot which was the outcome of a quarrel between Hindus and Muslims. Virtually the entire city took part in the rioting.

The disturbance is attributed to Hindus objecting to a Moslem boy drawing water from a certain well. The boy was violently beaten, and it is said to have died later in a hospital.

Canada To Bar Jap Women

Matter Is Being Taken Up Between Governments in Diplomatic Way

BIG TRADE POSSIBLE

Protest Launched Against Immigrants Who Rob Canadians of Livelihood

OTTAWA, July 11.—(Canadian Press.)—The Canadian government is considering the possibility of barring Japanese women from immigration. The matter is being taken up between the Canadian and Japanese governments in a diplomatic way.

The Canadian government is considering the possibility of barring Japanese women from immigration. The matter is being taken up between the Canadian and Japanese governments in a diplomatic way.

Government Gets Narrow Win in House

Garland Amendment, Restricting Bank Loans, Loses by 12 Votes

INSPECTION BILL NOW GOES TO SENATE

Progressive Member's Motion Regarding Note Re-demptions, Defeated

OTTAWA, July 11.—(By Canadian Press.)—The government's motion for government inspection of Canadian banks passed its final stage in the House of Commons today and now goes to the Senate.

There were several Progressive amendments and, in one instance, it looked for a time as though the government would be defeated.

Justice Between Nations Urged—Bona Law Plan Better Than Dawes'

PARIS, July 11.—The joint text drawn up by the Prime Minister of France and the Premier of Canada during their interview in connection with the Elks' convention, is not yet settled.

The joint text drawn up by the Prime Minister of France and the Premier of Canada during their interview in connection with the Elks' convention, is not yet settled.

Private Polo Ponies To International Match

NEW YORK, July 11.—The Prince of Wales, who will attend the international polo matches between the United States and British teams at Woodstock in September, will leave England August 26 and will send eight of his private polo ponies to this country, according to Marie W. Hopping, British polo player.

Mr. Hopping said the Prince does not intend to play in the open championship tournament or in the Monty Waterbury cup series, but probably will witness both events.

Elks' Chief Is Here For Convention

Grand Exalted Ruler Murphy Met by Mayor and Local Lodge

NUMBER OF DELEGATES TO EXCEED ESTIMATES

Next Week's Program Has Many Enjoyable Events For Visitors

W. Frank Murphy, Grand Exalted Ruler of Canadian Order of Elks, arrived last night from Montreal and will be a visitor in the city during the Elks' convention at the Elks' hall, Newfoundland here next week.

The special car, which brought Mr. Murphy and a number of other Elks, left Montreal at 11 p.m., was met by the local lodge, headed by Exalted Ruler A. A. McLean and Mayor Kenneth A. Blatchford.

## FREE SPINAL EXAMINATION FOR EXHIBITION VISITORS IF YOU VISIT MY OFFICE IN THE MORNINGS

Smiles are always the harbinger of good health. Chiropractic has made others smile and happy. I now have your consent so that I may alleviate your ailment. One treatment often changes disease to ease. You are welcome to visit my office.

**Dr. C. Crafts**  
D.D., S.D.  
Remson Block, 10444 101st Street  
Office Hours: 10-12; 2-5, and by appointment—Phone 4326.

## GOOD HEALTH AND POOR TEETH ARE STRANGERS TO EACH OTHER

YOU can not expect to enjoy good health if your teeth are not in good shape. If your teeth are not in proper order they will not maintain your food properly with the immediate result of an ailment of indigestion and all of its attendant troubles.

A visit to your physician may relieve you temporarily, but only a visit to the dentist's work will have a permanent cure. Don't delay making an appointment for your teeth are out of order. Cure the cause of your physical troubles rather than merely relieve the symptoms. You can also be assured that the work, when completed, will be of such a character as to increase the force of your personal appearance.

**EXPRESSION PLATES**  
In this form of dental work I am told by my many patients that I excel. My "Expression Plates" are the result of many years of practical experience, and are of such a superior type as to the excellence of the material used and adjusted with such painstaking care as to make me justly proud of my high reputation in this field.

EXHIBITION WEEK RESERVED FOR OUT-OF-TOWN PATIENTS  
**DR. J. C. SHARP, Dentist**

Suite 410 Empire Block - PHONE 6202- - Corner 101st St. and Jasper Ave.

## WILLIAM VINE

IS FINED \$100

Accused Was Convicted of Illegal Possession of Liquor

**SALE NOT PROVEN**  
Evidence Puts Man in Peculiar Position—Kept It For Friend

William Vine, of 10327 Jasper Avenue, appeared before Magistrate George J. McCallum in the Police Court yesterday and was fined \$100 and costs for illegal possession of liquor. He was not found guilty of keeping liquor for sale, and the charge was dismissed.

Barclay Jackson, defending, said that the case found in the possession of his client had been ordered of the owner of M. MacCallum, who it was said, had asked Vine to keep the beer for him when delivered by the brewery, as he would not be at home to receive it. MacCallum, said Mr. Jackson, had given his permit and the necessary money to Vine to complete the transaction, and it was not expected that the beer would be of the accused's premises more than one or two hours.

The magistrate, however, said that there had been a breach of the liquor act, and disposed of the case as noted. "My decision in this case," said Magistrate McCallum, "dealing with the charge of keeping liquor for sale, is that I am not satisfied that the evidence is sufficient to prove that the accused is a party to the sale of the beer, and I am not satisfied, and although the evidence is a certain amount of inference to be drawn, I do not think it is justifiable going to the extent of a conviction. Some evidence should be given by the Crown relating to the actual sale, and I shall give the accused the benefit of the doubt, and dismiss the case."

## McGILL PROFESSOR WILL SPEAK HERE

Medical Association Is to Hear Dr. Chipman, Noted Gynaecologist

Dr. W. W. Chipman, professor of gynaecology at McGill University will deliver an address at a meeting of the Edmonton Medical Association at the Royal Alexandra Hospital, commencing tomorrow at 8 o'clock.

On Saturday afternoon at 4:30 o'clock he will address the McGill Graduate Society and their friends at a tea to be given at the Macdonald Hotel.

## LABOR WILL MAKE TAG DAY SUCCESS

Organized labor has made complete arrangements for making the day for the miners at present strike a complete success. Few if any of the citizens of Edmonton will be able to forget the taggers, is the opinion of the organizer, J. H. MacCallum.

## WOMEN'S HANDICAPS

Headaches and Backaches Often Make Life Miserable

A woman's health handicap is almost always, this she believes and disbelieves that do not afflict men. Pain does not give her a fair chance. Her blood is more often thin and poor than a man's, and she often neglects the first beginnings of ill-health. Many women who seem destined to a life of frequent suffering have been freed entirely from their suffering through the wonderful blood-making quality of Dr. Williams' Pink Pills. Many a woman who has been told to get her back and side, a burning headache, a sense of having to retire, or what a pity women will not listen to their friends when Dr. Williams' Pink Pills have saved from their misery. Whenever a woman suffers they will help her—in youth, middle-age and afterlife. Mrs. John Mitchell of Middleville, Ont., gives her experience for the benefit of other women sufferers. She says:—"Some years ago I was badly run down. I could hardly walk around the house. I was so weak that I had to be helped to do very little. My boys and I had to do the housework. I started out when I got to the top of the stairs. My head ached terribly and my heart would beat violently. In the horrible condition I began taking Dr. Williams' Pink Pills. I was so much better. Then I got a further supply, and by the time I had taken these I could walk anywhere without being exhausted. The headaches had disappeared, and I am now perfectly well. Any woman who is run down, or who has trouble in her blood, take Dr. Williams' Pink Pills at once, as I am sure from my own experience they will build her up."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

## VEGREVILLE PLANS GOOD EXHIBITION

Company Is Formed to Put Enterprise on Par with Province's Best

The town of Vegreville is making a strenuous attempt to place its exhibition on a level with the best in Alberta, and has recently formed a company which has been incorporated under the name of the Vegreville Exhibition Association, with a capital of \$25,000.

This money will be expended in extending the exhibition grounds and generally making the grounds more attractive.

## LACOMBE LINE SHIPMENTS BIG

More Than One Million Bushels of Grain Handled During Season

Figures compiled by agents of the Lacombe line, Ltd., show that more than a million bushels of grain have been shipped over this little strip of line during the season.

Shipments between September 1, 1923 and June 30, 1924 were: wheat, 1,032,317 bushels. This total is made up as follows: Wheat, 1,032,317 bushels; oats, 174,111 bushels; barley, 174,111 bushels; and other grains, 21,000 bushels.

Shipments during June were: wheat, 217,111 bushels; oats, 241 bushels; barley, 241 bushels; and other grains, 241 bushels.

The total grain handled from September 1 to June 30, 1924 is as follows: Wheat, 1,032,317 bushels; oats, 174,111 bushels; barley, 174,111 bushels; and other grains, 21,000 bushels.

## CITY EMPLOYEES PLAN A PICNIC

Alberta Beach Will Be Scene of Festivities—Committees Formed

Alberta Beach has been chosen as the location for the fifth annual picnic of the Edmonton City Employees. A committee has been formed to make the arrangements for the picnic, which will be held on August 15.

The picnic will be held on the grounds of the Alberta Beach Hotel, which is a beautiful spot for a picnic. The committee has been formed to make the arrangements for the picnic, which will be held on August 15.

## FAIR GROUND MEN PLAN BAND CONCERT

Large Number of Visitors Expected in the City Today

It is expected that a large proportion of the out of town visitors attending the coming exhibition, will be in the city today.

For the benefit of those persons who are unable to attend the exhibition, a band concert will be given on the grounds on Sunday to show the activities now going on. It is announced that a concert will be given by the band of the 49th Battalion in the band stand tomorrow afternoon from 2:30 P.M. until 4:30 P.M.

## SCOUTS WILL MARCH IN STAMPEDE PARADE

Free Admission to the Fair Granted to Crews of City's Youth

Edmonton Boy Scouts are scheduled to take part in the big Stampede parade which will be held on Tuesday morning.

The Scouts will be led by their Scoutmaster, Mr. J. H. MacCallum, and will march in the parade at 11:30 o'clock Tuesday morning.

## AUGUST RICHIE'S WHEREABOUTS ASKED

The Missing Man Formerly Lived at 867 102nd Street, City

Major Kenneth A. Ritchie had been seen in original recommendation by the city commissioners after having been reduced from \$1,800 to \$1,000 last year.

## ECZEMA

Most for eczema and skin trouble. It is a skin disease which is caused by a variety of factors, including heredity, diet, and environment. It is a skin disease which is caused by a variety of factors, including heredity, diet, and environment.

## ALBERTA COAL YIELD DROPS

Strike Is Given as Principal Reason For Decline in Tonnage

A drop of approximately half a million tons of coal in the production of Alberta during the first months of 1924 compared with the corresponding period of last year is the information given by the provincial coal commission yesterday.

The coal yield was 481,825 tons in the first five months of 1924, as compared with 934,645 tons for the same period of 1923, a decrease of 452,820 tons.

Domestic coal mined showed a decrease of 194,825 tons for the first five months of this year, as compared with 371,825 tons for the same period of 1923.

A considerable increase, however, is shown in the quantity of bituminous coal mined, the figures showing: 481,825 tons for the first five months of 1924, as compared with 562,825 tons for the same period of 1923.

## SALT INDUSTRY STARTS IN NORTH

Derrick and Drying Sheds Erected at McMurray—Machinery on Ground

Rapid progress is being made in the salt industry in McMurray, according to visitors from the North. Two derrick and drying sheds have been erected, while derrick and other buildings have been completed.

Machinery has been brought to the salt well site from the Von Hagen and all claims further down the Athabasca, and the residents of the northern river control look for success of even greater activity in the immediate future.

## NORTHERN TRADERS ARE EXPECTED HERE

Colin Fraser, Real Old Timer, Will Be Member of the Party

Many far traders from the Lake Athabasca area will reach the city by train Friday morning, and will be met by the local traders at the hotel.

## MAJOR RITCHIE GOES TO ARCTIC

Mounted Police Officer Will Inspect Posts in Far North

Major James Ritchie, officer commanding the local division of the Royal Canadian Mounted Police, will be in the city for the first time in a long while on a tour of inspection which will take him down to the mouth of the Mackenzie river.

The primary reason for the journey is to inspect the new posts which are being constructed at Providence and at the mouth of the Mackenzie river. The third post was established this summer.

Major Ritchie will travel down by the Mackenzie river, and will be accompanied by a detachment of the 49th Battalion. He will be in the city for the first time in a long while on a tour of inspection which will take him down to the mouth of the Mackenzie river.

## ORANGEMEN'S PICNIC SLATED FOR TODAY

Members Will Parade to Station—Special Alberta Beach Train

This is the Twelfth of July, and will be fully celebrated by the Orangemen of Edmonton by a picnic to Alberta Beach, where a special sports day will be held.

The members of the day are the Orangemen to assemble in the 14th street street hall at 7:30 A.M. for a joint meeting. Afterwards the parade will leave the hall at 8:30 A.M. and march to the C.N.R. station, where a special train will leave for the beach at 9 A.M.

## CITY HAS RAISED THE Y. M. C. A. GRANT

Organization Will Receive \$900—Census to Cost About \$4,000

The city's annual grant to the local Y.M.C.A. has been increased to \$900, as originally recommended by the city commissioners after having been reduced from \$1,800 to \$1,000 last year.

The Y.M.C.A. board of directors, made application to the council for the new grant to be authorized last week and Mayor R. H. Cameron, acting on behalf of the Y.M.C.A., on Thursday night, announced that the city council will cost about \$4,000.

## ROBBERS LOOT ONOWAY BANK

A. P. P. Rushed to Scene—Work Was Amateurs

Robbers broke into the Onoway branch of the Standard Bank early yesterday morning, and rifling the safe while there was no one on the premises, escaped with \$5,000 in cash and some jewelry.

P. Bull, the bank manager, does not seem on the premises, and the thieves apparently made considerable money when they found, opening the rear door of the building with two crowbars.

The handle from two shots into the lock of the safe before the heavy door yielded, and they made their escape with the loot in an old Ford coupe. With the loot in an old Ford coupe, they made their escape with the loot in an old Ford coupe.

## TWO YOUNG MEN SENT TO JAIL

Robert Lynn and Peter McDonald Each Got Three Years

Robert Lynn and Peter McDonald, who were already on suspended sentences, appeared before Magistrate P. C. H. Pringle in the Police Court yesterday morning, charged with larceny from the person, and were each sentenced to three years in the Police Adult Reformatory.

The position in which young men without a track record are placed is "curious," said the magistrate, "and the court is sending them to the reformatory in the hope that if you behave yourselves your sentence will be terminated, and when you come out you should have learned a lesson."

## REMOVE CORNS BY HOT WATER

You can stop that corn or callous from aching in a minute or two. You do it in this way: Drop a little Putnam's Painless Corn Extractor over the tender surface of the corn or callous and the pain stops at once.

Drop a few more applications, and then after a hot foot bath the corn drops out. Can anything be simpler? You obtain certain results with Putnam's Painless Corn Extractor. Note the name. It cures corns and gives glorious results. Hold by all druggists.

## PUTNAM'S Painless Corn Extractor

TOO LATE TO CLASSIFY

13 ACRES GARDEN LAND FOR SALE. Price \$100 per acre. Main Empire Hotel, Room 24.

## To Exhibition Visitors

Take Advantage of This Opportunity

Out-of-town residents who come to Edmonton during Fair Week should take advantage of the trip to have an expert examine their teeth and advise them as to their condition.

Our offices are equipped with all the modern dental appliances, so that we will not detain you with your work.

We have made arrangements whereby the demands of out-of-town visitors will be given prompt attention, and any work for them done as quickly as possible. Qualified lay attendant. You can make an appointment for an examination by phone. Call 6225. Consultation and honest advice will cost you nothing.

## FANS ARE TREATED TO SPLENDID SOCCER GAME

Outlaws Play Lamont  
Today at Diamond Park

Without a doubt this afternoon's baseball battle between the Lamont club and the Outlaws will be good. The game is timed to get away sharp at 3 o'clock, and the background is Diamond Park.

Everything depends on the good old weather man. He holds the cards, and the Outlaws will be right; the people should be able to turn out "en masse" to see a real home-to-home baseball engagement.

Lamont has only lost one game this season. They do not intend to lose today's game. Neither do the Outlaws, who are being the case the future should be good.

Enough for the trust of half fans to have won.

If today's game does not turn out to be a financial "bust" the Outlaws will continue to have a good season in the country to this city.

The baseball played during the present season has been fair, but nothing to grow enthusiastic over. There are some fine players on the pro ball players, that being the case, it is all ready to take on the team in the country, and if the case of today's game, then the chance to the Outlaws, then the chance to the case the future should be good.

Come again  
this summer to  
the Canadian Pacific Rockies

Mile-high hikes through Alpine fastnesses—winding pony trails with thrills at every turn—precious lakes like gems—sky-piercing peaks, snow-clad. Gorgeous views, glorious sunsets. Fine air, fine sport with red, camera and canoe. Regal food and royal hospitality everywhere. That's the Canadian Pacific suggestion for your vacation. Won't you let us help you plan your trip?

### BABY SWALLOWED DOSE LYE, WITH FATAL RESULT

High Prairie Infant Lived But a Few Hours After Mishap

HIGH PRAIRIE, July 11.—Mr. F. H. Stover of the Prairie Oil, Ltd., spent last week in Edmonton on company business.

Mr. W. W. West, secretary-treasurer of Prairie Oil, Ltd., accompanied by Mr. Stover, an Eastern gentleman, spent Friday looking over the company's holdings at High Prairie. Premier Greenfield of Woodstock held a public meeting in the G.W.V. hall, High Prairie, on July 11th, in the interests of Jas. Call of High Prairie, the T.C.P.A. candidate in Greenfield constituency for the by-election held on July 11th.

Mr. J. H. Davis, leader of the opposition, Mr. Michael and others, held a public meeting in High Prairie on Thursday night, July 10th, in the interests of J. A. Giroux, the Liberal candidate in the Greenfield by-election.

Dr. E. L. McIntyre spent the last part of June with the Indian treaty party of the Lesser Slave Lake band and attended the Alberta Medical Association convention in Edmonton during the first week of July.

Miss Stella Becker, Orville McCue, Frances White and Oliver Travers have returned home after the school year in Edmonton.

Miss A. E. Nelson, who taught the junior grades in the High Prairie Consolidated school last term, has left for Edmonton to take a summer course at the University of Alberta.

Quite a number from High Prairie attended the sports at Kilmuir this week and all report a most enjoyable time.

The infant daughter of Mr. H. Chomkowski, well-known lawyer, died of typhoid fever on July 11th, at the age of five and lived only a short time. The child was buried in the T.C.P.A. cemetery at High Prairie on Sunday, July 13th. Rev. Fr. Petrus officiated.

### NOTICE TO CREDITORS

All persons having claims against the late estate of the late Mr. H. Chomkowski, deceased, are requested to present same to the undersigned at 1020-10th Street, Edmonton, Alberta, on or before July 15th, 1924, at 11 o'clock A.M. All claims must be supported by proper vouchers and receipts. Claims not so supported will not be considered. The undersigned is the executor of the late Mr. H. Chomkowski's estate.

### SALE NOTICE

Under authority contained in an order issued out of the Supreme Court of Alberta, in the estate of the late Mr. H. Chomkowski, deceased, in the action between:

WILLIAM HARTNUP, Plaintiff, and MARIE CARABANTON, GEORGE CARABANTON and JOHN RUDOLPH, Defendants.

I will offer for sale on the premises on Monday, July 14th, 1924, at 11 o'clock A.M. all the personal property and effects including the good will of the business known as the Club Cafe, carrying on at a restaurant house, 1020-10th Street, Edmonton, Alberta. The sale will be subject to a reserve bid. DATED July 10th, 1924.

JOHN RAE, Executor.

### To Painters and Decorators

TENDERS are invited by the Edmonton Public School Board for the re-decoration of the new school building. The following specifications may be obtained from the undersigned in whom tenders (accompanied by a 2% certified cheque) are to be delivered not later than 12 noon, Tuesday, July 15th. The lowest or any tender will not necessarily be accepted.

EDMONTON PUBLIC SCHOOL BOARD, 4100-10th Street, Edmonton, Alberta.

### To Plasterers and Others

TENDERS are invited by the Edmonton Public School Board for the re-decoration of the new school building. The following specifications may be obtained from the undersigned in whom tenders (accompanied by a 2% certified cheque) are to be delivered not later than 12 noon, Tuesday, July 15th. The lowest or any tender will not necessarily be accepted.

EDMONTON PUBLIC SCHOOL BOARD, 4100-10th Street, Edmonton, Alberta.

### TENDERS FOR ROAD WORK

Pursuant to the requirements of the Canadian Highway Act, sealed tenders will be received by the undersigned up to 12 noon, Monday, July 14th, for the following:

Project 2—Section 15, 16 and 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Project 5—Section 15, 16 and 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Project 6—Section 15, 16 and 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Project 7—Section 15, 16 and 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Project 8—Section 15, 16 and 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Project 9—Section 15, 16 and 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Project 10—Section 15, 16 and 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Project 11—Section 15, 16 and 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Project 12—Section 15, 16 and 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Project 13—Section 15, 16 and 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Project 14—Section 15, 16 and 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Project 15—Section 15, 16 and 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

# The TRUTH About **CENTRAL ALBERTA**

## CANADA'S RICHEST MIXED FARMING DISTRICT

To understand the application of the information in this special 1924 Immigration Number of The Edmonton Bulletin, the reader should get first a correct idea of the Central Division of the Province of Alberta, which is described in these pages.

Central Alberta occupies the great, rich valley of the North Saskatchewan. It is a park-like country with numerous small lakes and streams. It has a greater average rainfall and heavier natural vegetation than other portions of the Province. Altitude, 1500 to 2200 feet.

It lies in the same latitude as the South of England, Northern France, Belgium, Holland, Germany, Poland and the rich wheat-growing provinces of Russia. There are no semi-arid tracts in Central Alberta, and irrigation is never needed nor resorted to. Similar areas in European countries support 30,000,000 people, although the natural resources of these countries are not as great as those of Central Alberta.

Central Alberta now supports great numbers of cattle, sheep and horses, and though only partially settled and developed, it has become one of the principal grain, livestock and dairying districts of Canada. Two hundred thousand people have settled within its borders in the last thirty years. Yet there is room to multiply, and resources to sustain a population ten times this number.

This great section of Alberta is approximately equal in area to the States of Illinois, Iowa, Michigan or New York, and about the size of England. It is a country as beautiful as a park and as fertile as a garden. It is Canada's richest mixed farming district. It is the land of Sunshine and Opportunity, where Success and Happiness await to spread their rich reward upon the Tillers of the Soil.

Published by The Edmonton Bulletin, Edmonton, Alberta, to give accurate and reliable information of the conditions in, and advantages of Central Alberta as a mixed farming country, as an aid to prospective settlers and immigrants from all parts of the world.

# RANFURLY

A Post Office and Station on C.N.R., About 90 Miles East of Edmonton, and About 40 Miles West of Vermilion.

AS C.N.R. express office and telegraph office, also Provincial Government long distance and rural telephone systems, public school, three general stores, 3 implement agencies, two lumber yards, livery and feed barn, garage with all repair facilities, blacksmith, real estate and insurance, notary public, livestock dealer, harness and repair shop, poolroom and barber shop, hotel and restaurant, electric light service, two elevators with capacity of 115,000 bushels. Presbyterian services weekly.

The district surrounding is especially suited for mixed farming and stock-raising. To date over 200 cars of grain have been shipped from the 1923 crop, while about 4,000 hogs and 800 head of cattle are shipped annually. Good land within a reasonable distance of the village can be secured at very moderate prices, both raw and improved. Surface of the land is slightly rolling, with occasional small scattered bluffs; soil a dark loam with clay sub-soil.

Three miles south of the village lies beautiful Birch Lake, a large body of water with finely wooded shores and fine sandy beaches for bathing and boating, which is becoming more widely known every year as a summer resort.

## Drilling for Oil Is Being Carried On About 6 Miles South of the Village

# HUGHENDEN

is a town of Central Alberta. It is situated on the main line of the C.P.R. from Winnipeg to Edmonton and lies about 150 miles from the latter city, in a south-easterly direction.

The town contains four elevators---The Grain Growers, The Home, The National and The Saskatchewan. These houses handle each year from 350,000 to 400,000 bushels of grain.

The spiritual needs of the community are looked after by two churches, Anglican and Methodist, holding regular Sunday services.

The town contains a large two-room school, handling grades from one to ten, and a well kept golf course of nine holes has been laid off on the outskirts. Surrounding the town is a vast area of valuable grazing and farming land. The soil is a dark loam over a clay subsoil, which yields bountiful crops of grain and vegetables.

### Among the Business Houses We Have the Following:

W. L. TERRIES, and  
R. P. STUBBS, General Merchants.  
EMPIRE LUMBER YARDS, C. Young.  
DR. JONES, Physician and Surgeon.  
G. F. W. OTTO, Grocer and Butcher.  
WHYTE & ORR, and  
A. J. LAWLEY, Hardware Merchants.  
G. R. CARROTHERS, Druggist.  
J. H. COCHRANE, Real Estate.  
EDWARD BELL, Garage and Repairs

H. W. BETTS, Printer and Editor.  
J. HOODE, Shoe Repairing.  
HOODE BROS., Implement Dealers.  
M. HAGEN, Imperial Oil and Massey-Harris Agent.  
BANK OF MONTREAL (R. V. Campbell).  
POST OFFICE (H. Cowen).  
C. P. R. Station and Express Agent -- J. Ormrod.  
E. DIXON, Blacksmith.

The land is slightly rolling, with here and there clumps of poplar and willow, suitable for firewood and fence posts.

Water is obtainable any place in the district at depths of from thirty to fifty feet, in inexhaustible quantities, and the natural grass on uncultivated land yields an abundant supply of hay for cattle and horses.

The country for miles around has a day and night telephone service, centering in the town, and distant parts may easily be reached by car over graded roads, and the farmers of the district sell and ship their cattle and hogs through a local cattle pool.

# FERINTOSH

The Commercial requirements of the village and district are well supplied by general and special stores in cash line: Garages, Implement Agencies, Bank, Lumber Yard, etc. Shipping facilities for grain, livestock, cream and general commodities are well looked after, and liberally patronized.

There is a splendid opening for a good hotel and also another grain elevator, each of which would do well at once and add to the general prosperity of the village and district. Ferintosh district is a comparatively new one. The first general influx of settlers was in 1901. The settlers already here have with few exceptions made splendid progress, and a more solid, thrifty and contented settlement is hard to find in Western Canada. Yet we have room and still more room and splendid opportunities for numbers of farmers who are not afraid of good honest work and have an average amount of ambition, coupled with a reasonable amount of good applicable sense.

Men and their families of this type looking for a good opportunity can make no mistake in coming to this district, where they will be assured of a welcome and a helping hand by those who have already made their homes in this settlement.

The land in this district is generally gently rolling, which affords good drainage. It is free from muskeg, alkali and gumbo. Its rolling nature and being sufficiently timbered make it different from open prairie as it is not so wind swept and the timber helps to retain in the soil a considerable moisture that otherwise would be lost.

Firewood is plentiful and easily had and also well paid for farm purposes.

In this district the most of the cattle remain out of doors all winter and are fed in protected places from the

winds in the trees and invariably do well. Milk cows and calves are generally stabled. Horses not in use in the winter months rustle their own feed in the winter and invariably come out in the spring in good shape.

The climate is generally clear, healthy and invigorating. In winter it is generally clear and sunny, occasional snow storms generally free from bad driving and drifting winds; most winters cars are run nearly all winter as in the summer. The rainfall as a rule starts about the middle of May and continues through most of the growing season, and in the last 25 years has been sufficient to produce the best average crops that could be imagined. A crop failure in this district is unknown.

Harvest season and fall weather for threshing, etc., is always clear and sunny and this usually extends on until Dec. 1st and sometimes Christmas.

The soil is a rich black loam, one to two feet deep on a clay sub-soil. Soil drifting in this district is practically unknown.

Ferintosh is located in one of the best mixed farming districts in Central Alberta. It is essentially a mixed farming district and not confined to grain growing alone. This method is now considered the only safe way here as elsewhere to play the farming game. Most farmers find that they can take care of living expenses from the money secured from cream, butter and eggs, while the sale of grain, cattle, horses, hogs, poultry etc. will take care of taxes, farm upkeep and improvement of property and add materially to the social side of life. Last season the principal shipments from Ferintosh station amounted to: Wheat 230,000 bus., oats 160,000 bus., hogs 25,000; sheep 175; horses 60; cattle 1,075 head. Cream shipments amount to between

A village on the Edmonton and Calgary branch of the C.N.R., seventy-five miles south-east of Edmonton, twenty-four miles south of Camrose.

It has a population of about 200. It has C.N. express and telegraph offices, long distance and rural telephone office, also rural mail routes.

It is on the main Government highway from Camrose to Calgary, also on a main highway east and west.

Ferintosh is very happily situated on the eastern branch of Little

470 and 500 eight-gallon cans per month, which with butter and egg shipments keep the farmers supplied with ready cash.

The average yield of grain for the past ten years: Wheat 25 bus., oats 50 bus., barley 30 bus. per acre. Last year, 1923, which was marked by around favorable conditions, put the average as follows: Wheat 40 bus., oats 35 bus., and barley 45 bus. per acre. Besides the regular field grains and grasses that do so well, many farmers are now growing corn and sunflowers for silage purposes for milch cows and fattening steers. Some farmers use trench and some use built up soils. They are proving a grand success. Garden vegetables grow in great abundance, such as potatoes, cabbage, cauliflower, beets, carrots, turnips, parsnips, onions, beans, peas, lettuce, radishes and their quality is no where surpassed.

Rape, rye, sugar beets, etc., are used a great deal for summer feed and pasture for growing hogs.

This district is very fortunate in being free from noxious weeds, and very little bothered by insect pests.

There are a few lakes in the district that afford plenty of fish in season, and in the winter make it very convenient for the farmers and townpeople to have an unlimited and cheap supply of ice for the summer months. These lakes are in the winter a source of pleasure for skating, hockey playing, etc., and in the summer are much enjoyed by campers, bathers and picnic parties, and for boating.

Unimproved land in the district can be bought at from \$18.00 per acre up, depending on quality, location, etc. Improved land can be bought at from \$20.00 to \$40.00 or so, according to location, advantages and the amount of improvements, etc.

Every part of the district is served by very reasonably

Beaver Lake, which is two miles long and one-half mile wide---in a setting that for natural picturesqueness is seldom excelled in nature. Its location and surroundings are admired by all who have occasion to visit the village. The village has an abundant supply of splendid soft water, easily obtained, and has first-class drainage facilities. It has plenty of trees for avenues, parks and shade.

It has first-class public and high schools conducted by well qualified teachers. A number of religious denominations are represented.

good roads, which are being improved each year by the Municipal Council, so that every farmer has access to the main roads, which are quite numerous and are built and maintained at government expense, which in a new country is a very important consideration when marketing grain and farm produce.

Another index of the well-being of the district is that most of the farmers own an automobile which adds greatly to the convenience of doing business and also to pleasure and enjoyment of farm life.

Another important asset of the district is that there are deposits of gravel and sand, favorably located. This gravel and sand is being considerably used for the building of foundations for barns and houses and also for the improvement of the roads.

Soft coal is plentiful and is being mined in some places. There is a plentiful supply of wild game in the district, including wild geese at times, wild ducks, partridges, Hungarian partridges, prairie chickens, rabbits and jack rabbits. Coyotes are scarce.

Rural schools throughout the district are plentifully and well distributed and well maintained. This is a good indication of the high quality of the settlers in the district. The principal nationalities that are represented in the district are Scandinavians, Germans, Americans and eastern Canadians.

The natural advantages and future possibilities of this district have been in this short sketch merely mentioned and to appreciate them you should see them.

For further information, which will be gladly supplied, and the names of permanent residents who will also relate their experiences, etc., apply to the Secretary, Board of Trade, Ferintosh, Alta.

# STONY PLAIN

## Last Year's Shipments from Stony Plain

Grain shipments 1923... 600,000 bushels  
 Cream shipments 1923... 440,200 gallons

Poultry shipments 1923... 75,000 pounds  
 Stock shipments 1923... 75 cars

AVERAGE YIELD WHEAT 25 BUSHEL PER ACRE

—Stony Plain gets its name from the Old Indian camping ground of the thrifty Stony Indian tribe. It is one of the most prosperous mixed farming districts in Central Alberta.

—Stony Plain is free from stones and is noted for the wonderful potatoes it grows. Stony Plain ships on an average of 75 cars of potatoes per year to Edmonton and Vancouver.

—The town of Stony Plain has a population of 500. It is situated on the Canadian National Railway, 22 miles west of Edmonton. All lines of business are represented in the town.

—Stony Plain has an excellent four-roomed consolidated school and four churches—Anglican, Methodist, Lutheran and Catholic. Skating and curling rink, tennis grounds and good fair grounds.

—Lots of good shooting in the Stony Plain district; it is close to popular summer resorts. Coal can be had at \$1.50 per load to farmers. Stony Plain has an excellent telephone service.

The Stony Plain district is ideally suited to mixed farming. Beautiful rolling country with numerous small bluffs and small lakes. Ideal for stock raising. The land is a black sand loam with clay sub-soil.

No Other Section of Central Alberta Offers Better Opportunities for Farm Settlers Than the District Around Stony Plain

# CLYDE

Clyde is 48 miles north of Edmonton on the Canadian National Railway. It has a population of 150 and is the centre of an exceptionally rich mixed farming area.

Land in the Clyde district is slightly rolling, with numerous small bluffs for stock shelter. Plenty of good water is available at all times. In 1923 Clyde shipped 150,000 bushels of grain.

Land in the CLYDE District Sells From \$10 to \$40 Per Acre.

There are splendid openings for a Creamery and Cheese Factory and for a good Doctor, Baker and also a Harness Shop.

CLYDE is ideally suited  
 for Mixed Farming,  
 Wheat Growing and  
 Ranching.

CLYDE HAS TWO ELEVATORS, LUMBER YARD, 2 RESTAURANTS, REAL ESTATE AND INSURANCE, 3 GENERAL STORES, BANK, 3 CHURCHES, LIVERY AND FEED STABLE, FOUR-ROOMED SCHOOL, MEAT MARKET, DRUG STORE, GARAGE, MACHINE SHOP, BLACKSMITH, POOL-ROOM AND BARBER, 2 IMPLEMENT SHEDS, GOOD HOTEL AND CONFECTIONERY, FAIR GROUNDS AND RACE-TRACK.

## MIXED FARMING OPPORTUNITIES

The man who will go into mixed farming in the Clyde District is assured of success. Grain crops are always good and crop failures are unknown. Livestock thrives in the Clyde District. Horses, cattle, sheep and hogs can be raised for good profit. The district enjoys wonderful climate and abundant rainfall and excellent roads the year around. The man engaged in mixed farming in the Clyde District has good markets for his products. It is close to the larger centres and has the best of railway shipping facilities.

MIXED FARMING IN THE CLYDE DISTRICT Means Health, Wealth, Prosperity and Happiness

# CADOGAN

140 Miles South-East of Edmonton on Main Line C.P.R. Edmonton to Winnipeg

CADOGAN IS A THRIVING CENTRE, WITH A POPULATION OF 250 PEOPLE. IN THE TOWN OF CADOGAN ARE TWO IMPLEMENT SHEDS, STOCK YARDS, THREE ELEVATORS, THREE GENERAL STORES, HARDWARE STORE AND GARAGE, LUMBER YARD, RESTAURANT, DRUG STORE, SHOE MAKER, BLACKSMITH SHOP, BUTCHER SHOP, POOL ROOM AND BARBER SHOP, ELECTRIC LIGHT PLANT, BANK, POST OFFICE, MUNICIPAL HOSPITAL AND PICTURE SHOW.

CADOGAN IS CENTRED IN ONE OF THE RICHEST AND MOST PROSPEROUS MIXED FARMING DISTRICTS IN ALBERTA. ITS BLACK LOAM SOIL HAS NEVER FAILED TO PRODUCE LARGE YIELDS OF HIGHEST QUALITY GRAINS. THERE ARE THOUSANDS OF ACRES OF GOOD GRAZING LAND WITH PLenty OF WATER. FOURTEEN MILES WEST OF TOWN A BEAUTIFUL LAKE AFFORDS EXCELLENT BOATING AND BATHING, AND THERE IS GOOD SHOOTING IN THE DISTRICT.

The farmers of the Cadogan district are always assured of a first-class market for anything they produce. The district is well served by the Canadian Pacific Railway main line to Winnipeg. Daily passenger trains in each direction, supplemented by several freight trains, is the daily service.

LAND IN THE CADOGAN DISTRICT SELLS FROM \$15 TO \$50 PER ACRE

For soil fertility, abundant rainfall and ideal climatic conditions, mixed farming in the Cadogan district offers the prospective settler every advantage. Attractive social conditions and educational facilities make for progress and contentment in the district.

SUCCESSFUL FARMING IS ASSURED IN CADOGAN DISTRICT

# FARM, GARDEN AND LIVESTOCK

## Farmers Commencing To Market This Year's Surplus Poultry

### POULTRY NOW BEING SHIPPED

Live Poultry from Different Points Consigned to Marketing Service

### TWO CARLOADS

Farmers Should Market Poultry as Early as Possible, States J. H. Hare

Live poultry shipments are beginning to come from country points. At the beginning of next week the Provincial Poultry Commission department will receive two cars of live poultry consigned to their care for shipment through the marketing service of the government.

The car shipments are made up at two points. One car consigned to the Canadian Poultry and Commission department is being shipped to the marketing service of the government.

First shipments. Plans in connection with the marketing of the province are not yet made. It is expected, however, that it will be made before the end of the month.

The plan was instituted last year and the results are promising. The marketing of poultry is being handled through a marketing service of the government.

### HIGH TESTING MILK MAKES MOST CHEESE

Cheese Factory Should Pay for Milk According to Butterfat Content

Investigations carried out by the Dairy Department and the Chemical Department of the O.A. College with low and high testing milk used in the manufacture of cheese gave results that are interesting to cheese factories.

The yield of cheese per 100 lb. of milk was 35.5 lb. from the low testing milk and 31.4 lb. from the high testing milk, or nearly 4 lb. more for a very small increase in the percentage of fat and total solids. The college also found that this is further evidence of the inclusion of per for milk on the basis of weight and not on the basis of fat and solids content of milk when dividing money among cheese factories.

### STARTED FLOCK SHEEP WITH THREE OLD EWES

Keep Place Clean and Use Feed That Would Be Wasted

P. H. Toller, of Orion, Alberta, now has a flock of 125 sheep from three old ewes which were considered as poor to sell. The flock consists of a fairly good bunch of cross-bred Shorthorns, and which gave him an increase of 50 per cent in lambs this year.

Mr. Toller is making a big success of a small flock and in addition to the lamb and mutton he sells a good wool clip every summer. The sheep keep him busy in utilizing feed that would otherwise be wasted.

### SHORTHORN COW HOLDS RECORD

Canadian Holstein Holds Second Place—Is Dual Purpose Type

It has been announced recently that a pure bred Shorthorn cow, 15th, of the Holstein, owned in Australia, has completed an official record during which she made three milkings a day in 360 days, 25,774 lbs. of milk and 1,393 lbs. of butter.

She is the only cow in the world to hold this record. The record was made in the year 1912 when she produced 21,423 lbs. of milk and 1,393 lbs. of butter in 360 days on two milkings a day.

A further feature in connection with the record of 15th is that she is also reported to be an outstanding dual purpose animal. The following statement by the breeder of this cow gives evidence of her size: "When dry she weighs regularly on pasture. She increased from April, 1923, to June, 1923, while dry from 1,685 lbs. to 2,125 lbs. without hand feed."

### BACTERIA CONTENT REDUCED IN MILK

The best method of cooling milk and cream is to run it over an aerator through which cold water is being pumped directly from a good well. This will cut down the bacteria content of the milk.

The water is pumped directly through the cooler which is of the tubular type and this water is not wasted, but goes from the cooler into the tank from which the water supply necessary for the cattle, horses and general farm use is drawn. He has to pump the water anyway, and it is no more difficult in fact it is easier, he says, to pump it at this time of day than at any other.

The milk as it is milked is run over the cooler and the temperature reduces close to 55 degrees. The milk is then pumped into an ice box until delivered. It is in this way that the bacteria is reduced in the milk after it has been properly cooled.

Refrigeration equipment is not necessary to make and milk. The main factor, says this farmer, is the dairymen himself. It takes a clean man to make clean milk. On his own farm he says he has had the same equipment the last time content of the milk decreased from 100,000 to the cubic centimeter in 1,000 by putting into the dairy a man who was naturally clean in place of a man who did not look after the details.

### Has Her Own Circus

After a hard day's work under the hot sun, try a little relaxation and fun like this. Mrs. Charles Hulse, bob-haired comely of Stonewall, Wis., can get her big green bull to bow for the ladies and do all sorts of acrobatic stunts. Pick one of your own herd for a show.

### Promoting Growth

It is a good plan to drive stakes close to the plants after they have started to come up to insure rapid growing shoots.

Should you desire but one single and great flower to a plant, disbud all but one flower while growing.

But in general garden practice where plants are especially desired for decorative purposes, it is best to let all the flowers mature into what florists call "sprays of bloom."

Although chrysanthemums, except the single and white varieties, are quite fast growers, especially to the cold of late-blooming plants, should be guarded against by some sort of temporary shelter during the winter.

Most commonly a frame is built over the and on which holed cash can be laid and the sides covered with burlap or similar material.

It is best, though, to have cloth sides on the shelter. Roll these up during the day.

Small collections of plants may be grown in pots and kept in the shelter until they should be set in a specially reserved cold frame, with the soil roof raised high enough on corner supports to clear the chrysanthemums.

### U. S. REFUSE TO SELL TUBERCULAR HERDS

Illinois Stock Farm Tries to Purchase Tubercular Reactors

A stock farm in Illinois has filed a suit against the Department of Agriculture for the state because the Department refused to allow them to buy reactors from tubercular herds, tried them and sell the surplus.

## DAIRY FARMING

### The Sheet Anchor of Alberta's Agriculture

In 1912, when the Woodland Dairy Limited was incorporated, Alberta's Dairy industry represented an inconsiderable side-line of the farmers of the province.

The business of dairy farming is still only one of the activities that engage their attention, but the majority of farmers frankly recognize nowadays that the returns from even a small herd of milch cows contribute very materially to their prosperity.

The dairy cow is the only animal on the farm that shows a daily cash return for the attention given it. For this reason, if no other, dairy farming should have an important place in the plans of one starting to make a home on an Alberta farm. It will lay the sure foundation for future prosperity.

And if we can assist, in any way, to make easy the path for a newcomer to our province, or to help solve the problems of any dairymen now here, we shall consider it to be at the same time a duty we owe to the industry of which we are a part, and a genuine pleasure as well.

## MEDAL AWARDED STEADY STREAM FOR NEW PLANTS OF IMMIGRANTS

Canadian Florists, Garden-Agencies Are Locating t  
ers Encourage New Florist New Settlers in  
Creations—Donate Medal Alberta

In order to encourage the immigration of improved farm labor, the Australian Government has established a special fund for the purpose of subsidizing the fares of immigrants who are married couples, or who have children, or who have been employed in agriculture in the United States. The fund also covers the fares of immigrants who are "desirable" in the eyes of the Government. Those who do not meet the requirements of the fund are known as "undesirable" immigrants. The Government is not prepared to subsidize the fares of these immigrants. In the United States, the Government is not prepared to subsidize the fares of these immigrants. In the United States, the Government is not prepared to subsidize the fares of these immigrants.

Mr. Marker, the output this year will probably reach the high figure of 21,500,000 pounds, an increase of 3,500,000 pounds. This does not include cheese or other dairy products.

**More Mixed Farming**

Farmers are gradually going to the south and west, and the natural result is that they are adding more dairy cows to their herds for cowboys for consumption of the increase. Mr. Markes says:

"On the other hand, there is the tendency on the part of farmers to keep a better class of dairy cattle, and to produce a better quality of milk, desired in all parts of the province, and as a result that the farmers are beginning to realize that cowboys are the most profitable to raise, and are replacing the poorer producers with better ones."

**Winted Over Well**

Mr. Markes also contends that the work done through the winter is the best of any season, and that the condition resulted in a larger production of manure.

**James Richardson & Sons, Ltd.**  
*Has Been Serving Canadian  
Farmers Since 1857*

## ALBERTA IS A PROVINCE of RICH RESOURCES

*Splendid Opportunities For the Settler and the Investor Within Its Far-Flung Boundaries*

### The Province of Alberta, Canada

is noted for the extent, fertility and comparative cheapness of its agricultural lands, for its possibilities in grain production, dairying and stock raising, for the potential richness of its natural resources, for the excellence of its educational system, for the advanced public health policy in operation, for its attractive climate, its unsurpassed mountain scenery, and for its energetic, democratic people.

### Some Facts About Alberta

**Area**—The area of Alberta is 254,000 square miles, more than twice the area of the British Isles, and larger than France or Germany.

**Population**—The population of Alberta is 600,000, or less than three persons per square mile of area.

**Arable Area**—There are more than 72,000,000 acres of land in the surveyed area of Alberta capable of agricultural production, and less than one-sixth of this was under cultivation in 1923.

**Agricultural Production**—Alberta produced 167,000,000 bushels of wheat in 1923, an average of 28 bushels per acre over its total wheat area. The production of creamery butter has grown more than five times in twelve years, and now Alberta butter is being sold on the British and foreign markets. The value of all agricultural products in 1923 was \$223,000,000.

**Farm Lands**—Improved and unimproved farm lands, irrigated lands and ranch lands are procurable in Alberta at reasonable prices. Free homestead land available.

**Natural Resources**—Alberta has a vast coal area totalling more than 14 per cent. of the world's known coal area and more than 87 per cent. of all Canada's coal areas. Albert also has great supplies of natural gas, evidences of the existence of large deposits of petroleum, valuable deposits of bentonite, salt, building stone and other minerals. More than 15,000 square miles of bituminous sands exist in northern Alberta.

**Transportation**—Alberta has 4,700 miles of railways, and more than 60,000 telephones, of which more than 20,000 are in rural homes.

### Alberta Welcomes the Settler

who comes as a home-maker. There is opportunity for the settler who is thrifty and industrious, who has sufficient financial resources to establish himself. For this class of settler there is real opportunity.

For the investor, Alberta bonds are of the most attractive character, backed by the almost limitless resources of the province. In the potential richness of the natural resources and in their future development, there is abundant opportunity for the investment of capital.

One of Alberta's Modern Coal Mines

# HARDISTY

For more than a quarter of a century Hardisty has been recognized as one of the most reliable mixed farming districts in Alberta. Settlers in the Hardisty district have all been successful and have raised some of the finest crops in the west. As a mixed farming district Hardisty stands pre-eminent in Central Alberta.

The town of Hardisty has a population of 550. Population of the district 3,200. The soil around about Hardisty is a clay loam, with clay sub-soil. Record yields of grain are grown annually in this district. Hardisty has every advantage of railway shipping facilities and closeness to markets and larger towns and cities.

In the town of Hardisty many lines of business are represented:—two real estate offices, four implement sheds, three livery barns, two hardware stores, two furniture stores, hotel, two butchers, two general stores, three restaurants, two pool rooms, tailor, barber, baker, oil tank, gent's furnishings, drugs, jeweler, harness, photographer, creamery, lawyer, newspaper, printer, electric light plant, grocery, two garages, three elevators, lumber yard, two doctors, dentist, veterinary surgeon, public and high school, three churches, board of trade, milliner, garage, brick plant.

## Hardisty is on Main Line C.P.R., South-east of Edmonton

OPPORTUNITIES FOR MIXED FARMING SUCCESS HAVE NEVER BEEN BETTER THAN RIGHT NOW IN THIS DISTRICT. THE PROSPECTIVE FARMER SETTLER WILL MAKE NO MISTAKE IN COMING HERE.

# CHIPMAN

Fifty miles east of Edmonton on the Canadian National Railway. Urban population 300; rural population 7,000. Chipman has five elevators, graded school, three churches, flour mill.

The soil in the Chipman district is a rich black loam with clay subsoil. The district is especially good for mixed farming. Cattle, horses, sheep, hogs and all livestock thrive in the district. There is always an abundance of feed and water, and the farmer who will go into mixed farming is always playing safe and assured of a good and comfortable living.

THE SHEEP INDUSTRY IS GAINING A SOUND FOOTHOLD IN THE CHIPMAN DISTRICT AND THERE IS GOOD MONEY IN EGGS AND POULTRY. CHIPMAN IS WITHIN SHORT HAUL OF EDMONTON MARKETS AND STOCK-YARDS. AS A GRAIN-GROWING CENTRE, CHIPMAN IS FAST COMING TO THE FRONT. DAIRYING IS A FAST GROWING INDUSTRY AROUND CHIPMAN AND THE SETTLER WHO INCLUDES A SMALL HERD OF DAIRY COWS IN HIS FARMING OPERATIONS HAS A SURE AND STEADY CASH INCOME THE YEAR ROUND.

## THERE IS ROOM AND A WELCOME IN THE CHIPMAN DISTRICT FOR THRIFTY FARM SETTLERS.

THE TOWN ITSELF IS A BUSY, THRIVING CENTRE, WITH PRACTICALLY ALL LINES OF BUSINESS REPRESENTED. CHIPMAN IS GROWING AND IS DESTINED TO BE ONE OF THE BEST TOWNS IN CENTRAL ALBERTA.

# VIKING

The wonderful fertility of the soil, together with the contour of the country, make the Viking district of Central Alberta most ideally suited to Mixed Farming. No district in the entire province is more picturesque and no section more adaptable for successful farming.

Few sections contain a larger area of land so well suited to stock-raising and mixed farming. In this district the raising of beef cattle is a safe undertaking. Pasturage is abundant everywhere. Native hay is likewise abundant. Horse-raising is also being carried on in the district. Swine breeding and sheep raising are profitable industries in the Viking district.

The climate and rainfall in this section are ideal for the growth of vegetation. Splendid crops of grain and vegetables are grown annually with a great degree of certainty. The rainfall, generally speaking, is ample. General mixed farming is profitable and few districts are so well adapted. With its many advantages—rich soil, abundant feed, even climate, available markets, and elevators, railway facilities, schools, good roads, telephones, excellent water, small lakes and rivers, and valuable poplar groves, the Viking district is unsurpassed as a location for a future farm home, both from a practical and picturesque point of view.

Viking has an urban population of 450 and rural population of 3,000. Four elevators, capacity 250,000 bushels, abattoir and stockyards, co-operative creamery, fine municipal hospital, and public and high schools. Viking is the centre of a great natural gas field. Special inducements to locate manufacturing plants here. The soil is a black loam on a clay subsoil. Viking is eighty miles southeast of Edmonton on the main line of the C. N. R.

# DAYSLAND

## Crop Yield

Government returns carefully compiled place the average yield for this part of Alberta at: Wheat, 25 bushels per acre; oats, 61 bushels per acre; barley, 43 bushels per acre. It should also be noted that the grain here weighs much more than in some countries, wheat commonly weighing 62 pounds to the bushel and oats 42 pounds or more. Experiments with alfalfa are proving quite satisfactory, as well as with clovers and cultivated grasses. Flax is largely grown and produces well. Potatoes and root crops of all kinds do well with little labor.

## General Conditions

Abundance of water, excellent ground for the pasture and have fertile soil, sufficient rainfall and an excellent climate combine to make the Daysland District ideal for mixed farming. Capital money is in circulation on the ground well substantiated by every assessment.

## Location

Daysland, Alberta, is situated conveniently near the centre of a large tract of choice agricultural land, comprising about 2,000 square miles, steadily increasing in value as its worth becomes better known. The settlement of the district began about twenty years ago, and a branch line of the Canadian Pacific Railway reached it from Wetaskiwin late in 1905. This line has now become the through line between Winnipeg and Edmonton, so that Daysland is nearer Winnipeg than is Calgary, while it is only about ninety miles from Edmonton, by railway.

Farm in the Daysland District

## Cheap Fuel

One of the greatest advantages enjoyed by the Daysland District is the ease with which a good quality of coal can be obtained. Numerous small mines are being operated along the Battle River, which runs along the north of the district, and coal is sold from these mines loaded on wagons. Most of it is now screened before leaving the mines and is used exclusively in the homes of the district. There is also a small supply of wood, such as willow, poplar, birch and balsam of gilead.

## Land Available

Homesteads are no longer available in this district. Raw land may be had at from \$15 to \$25 an acre, while partially improved farms can be secured at from \$15 to \$40 an acre.

# KILLAM

**K**ILLAM has six elevators, four churches, six-room school, picture show, harness shop, three general stores, drug store, butcher, bakery, bank, two lumber yards, hotel, two restaurants, hospital, doctor.

Crop failures are unknown in the Killam District. In 1923 season shipped from Killam realised 1,000,000 bushels. Killam has a population of 700. Land in the Killam District can be bought at from \$15 to \$50 per acre.

Killam is on the main line of the Canadian Pacific Railway from Winnipeg to Edmonton, 130 miles north and 70 miles east of Calgary, 130 miles southeast of Edmonton.

The town of Killam is situated in the most fertile wheat producing area in Alberta.

There are 200 water courses, owned by the farmers within a radius of fifteen miles of Killam.

The district is highly improved.

Forty per cent. of the farm buildings are fully modern, with electric lights, hot and cold water and all conveniences.

Rural mail delivery to the farmers tri-weekly.

Rural telephones radiating from the town in all directions.

There is ample supply of excellent water at 20 feet and upwards.

Killam markets \$1,000,000 worth of grain annually and another \$300,000 in cattle, horses, hogs and farm produce.

Killam land produces from 30 to 50 bushels per acre of the choicest spring wheat grown on the continent. Oats yield from 50 to 100 bushels per acre.

The Killam District possesses the most desirable climate. The elevation is 2,400 feet above sea level.

The Killam schools are first class; churches are many. The schools and churches attest of the high character of our citizens.

Resources and general conditions of the Killam District represent a complete complement of all anyone can wish, and is just what thousands are looking for.

Summing it all up, the Killam District will suit you, and is the place for you to acquire a most beautiful and remunerative home.

# BAWLf

## NATURAL GAS

When the natural gas of Bawlf is properly developed, it will make Bawlf the second "Yellow Head" or really the "Gas City of the Northwest." Gas will be the future material for light and fuel in both the town and surrounding district. Gas has been found in nearly every well in the town and surrounding country. It has been estimated that enough gas escapes from any of the wells to heat and light one or more dwelling houses.

## MARKETS

Direct shipment to the Winnipeg market made possible that F. R. Bawlf has secured a contract to ship directly to the London and the Pacific Coast. Nearly all cattle, hogs, and grain are shipped east, while butter, eggs and hay are shipped to western points.

## MARKET GARDENING

A good market can always be found for all kinds of vegetables. All the more hardy vegetables grow in production. No cabbage worms and potato beetles are absolutely unknown.

## POULTRY RAISING

Owing to the dry climate, poultry raising as a business is very successful, and any one who wishes to enter into the work, establishes for himself an ever-increasing source of revenue.

## SUMMER RESORTS

Dried Meat Lake, a few miles southwest of Bawlf, and Dundy Lake, a few miles north of the town, are two ideal

summer resorts where hundreds of people spend their holidays. Steam launches, gasoline boats and row boats are always at hand.

## FISHING

The lakes in this district, and the adjoining districts, abound in White fish, Pickerel, Trout, Pike and Carp, and fishing is entered into both for pleasure and profit.

## THE SPORTSMEN'S PARADISE

Small game is very plentiful in the Bawlf district, and is being hunted by thousands of sportsmen from the United States and Canada. The game consists of Geese, Waders, the prairie species of Ducks, Prairie Chickens, Partridge, and all kinds of Snipe, Pheasants, Wild Pigeons, etc.

## CHEAP FARM LANDS

Good farm lands, both well and improved, can be had at prices ranging from \$10 to \$50 per acre, according to location and improvement.

## ELEVATORS

Bawlf has three elevators and a grain warehouse, with ample capacity for storing and handling the crops grown in the district.

## BUSINESS OPENINGS

Bawlf has several good business openings for live, enterprising men.

## THE PARK REGION OF ALBERTA

The above name has been given to the Bawlf district and justly so. People coming from a prairie country will

quickly realize the benefit to be derived from small groves scattered here and there. A great amount of time, labor and money is saved by being able to build at, or in a grove instead of first building and then planting the trees around the buildings. The groves consist mainly of Poplar, and when protected from fire, yield material for fencing and fire wood.

## FLOWING WELLS

A careful count gives twenty flowing wells within a very small radius around the town of Bawlf. The water in these wells is soft and pure and the supply is inexhaustible.

The district around Bawlf is one of the most fertile in the Province, the composition of the soil being a black loam, which runs from 10 inches to three feet in depth; this is underlaid with a heavy clay subsoil which retains the moisture and supplies it when the surface is cultivated.

## EXTENSIVE GRAIN RAISING

Wheat raising has long since passed the experimental stage in the Bawlf district, and is now one of the chief cereals. Spring and winter wheat are both raised very extensively, the yield ranging from 35 to 40 bushels per acre.

Oats are one of the best crops that can be raised, owing to the heavy yield, the average being 50 to 60 bushels per acre, while 100 bushels are very common.

Barley grows equally well, and yields of 40 to 50 bushels per acre are very common.

Flax has also passed the experimental stage, and is now being grown quite extensively. It is a favored crop on spring breaking.

Roots such as potatoes, turnips, beets, etc., yield abundantly and of the best quality.

## CATTLE RAISING

Cattle raising for beef purposes is an ever-increasing source of profit to the man who engages in diversified farming in the Bawlf district.

## BUSINESS SECTION

Bawlf has a good fire hall, cheese factory, school, three churches, drug store, three general stores, doctor, two garages, two hardware stores, blacksmith, butcher, three restaurants, implement dealers, lumber yard, three elevators. Bawlf shipped 800,000 bushels of grain in 1923 and produced dairy products valued at \$40,000. An Old Folk's Home is located at Bawlf.

## CHURCHES

Two religious denominations, each with neat churches, good congregations and resident pastors, are represented in the town.

The officers of the Bawlf school deserve great credit for their efforts in bringing the schools of the town up to a high standard. The children are provided with educational advantages equal in every respect to those of much larger cities.

# STROME

A lively, thriving, busy town on the main line of the Canadian Pacific Railway southeast of Edmonton. On the Government highway Winnipeg to Edmonton. It is the centre of a highly developed, well settled mixed farming district. The population of the Strome district is about 1500, comprising the very highest type of settler, principally English, Scotch and German.

**1923 CROPS** The Strome district in 1923 shipped 53 carloads of cattle and hogs; 700,000 bushels of wheat and 70,000 bushels of coarse grains. The soil in the Strome district is a rich chocolate loam, yielding from 25 to 45 bushels of wheat to the acre. Land may be had at from \$15 for raw land to \$55 per acre for improved farms.

Strome has four elevators and one flour mill; two churches---Presbyterian and Roman Catholic; two schools teaching kindergarten, intermediate and high school. Strome has one doctor, one lawyer and a weekly newspaper and printing office. Strome offers the prospective settler and newcomer the utmost in farming opportunity amidst ideal conditions. Climate, rainfall and soil fertility of Strome district are unexcelled anywhere.

INVESTIGATE THE STROME DISTRICT BEFORE YOU LOCATE

# RYLEY

**CROP FAILURES ARE UNKNOWN IN THE RYLEY DISTRICT**

Ryley is situated on the Canadian National Railway, 52 miles east of Edmonton, and also on the C.N.R. line between Camrose and Vegreville. This excellent railway service gives Ryley splendid shipping facilities. Ryley is situated in the heart of the best mixed farming district in Central Alberta.

FARM LAND IN THE RYLEY DISTRICT CAN BE PURCHASED AT FROM \$15.00 TO \$50.00 PER ACRE, ON THE VERY BEST OF TERMS.

**Average Grain Yield in Ryley District:**

WHEAT 25 bushels to the acre.  
OATS 50 bushels to the acre.  
BARLEY 30 bushels to the acre.

Grain shipments from the Ryley district in 1923 totalled 800,000 bushels. Crop failures are unknown. Farmers in the district can secure good coal at \$2.25 per load and natural gas facilities are also available.

The Ryley district has a number of good Schools, while an Up-To-Date Creamery is located in the town. Ryley has a live Board of Trade and a modern Electric Light Plant. Farms on the gas line to Edmonton can secure gas service in their homes. According to experts, the Ryley district with its rich black loam grows the finest wheat for milling purposes in Alberta. There is plenty of good water, good shooting and telephone service. The land is rolling, with small bluffs, making an ideal district for sheep and cattle ranching.

Ryley ships on an average of 4 Cars of Stock to Edmonton Stockyards each week. The settlers in the district are the very best type. The Ryley district boasts the best roads the year around

**THE RYLEY DISTRICT HAS EVERYTHING THAT MAKES FOR SUCCESSFUL FARMING**

For information write to

RYLEY BOARD OF TRADE or the ROYAL BANK OF CANADA  
Ryley, Alberta, Canada

# LEDUC

*Twenty Miles South of Edmonton, at the Gateway of the Capital*

The busy town of Leduc, situated on a pretty little lake, twenty miles south of Edmonton on the Calgary and Edmonton branch of the C. P. R., is the centre of this splendid district. It has two schools for common and high school work. Children from the district are thereby enabled to obtain high school education without having to go to the larger centres where expenses are necessarily much higher.

The town is electric-lighted, the municipality owning a very efficient and up-to-date power plant. There are five general stores, three hardware stores, two banks, two lumber yards with planing mills, etc., a flour mill, five large grain elevators, four garages, two grocery stores, two drug stores, a newspaper and printing office, a bake-shop, confectionery stores, etc., two butcher shops, cream shipping stations, a cheese factory, stock yards, etc. There are also four resident physicians, a resident dentist, two resident lawyers, and two veterinary surgeons.

The town has five churches, a theatre and dance hall, two lodge halls, an up-to-date curling rink, and a twenty-acre park equipped with race track, grand stand, exhibition buildings, etc., which are used for the annual fair.

Public organizations, such as the Board of Trade, Community League, U. F. A., U. F. W. A., Women's Institute, Agricultural Society, etc., are well represented.

Leduc is the centre of the best mixed farming area in Alberta. The soil is a deep, rich, black loam with a large percentage of humus, and a clay sub-soil. The depth of the top soil averages from fifteen to twenty-five inches.

The country is slightly rolling, interspersed with bluffs of timber and small trees, small creeks being numerous. A plentiful supply of water is obtainable anywhere at a depth of from twelve to twenty-five feet.

While a large percentage of the district is open prairie, there are on every section of land small patches of timber and small growth, affording material for building, fencing and fuel.

## NATURAL GRASSES

Blue joint, peavine, vesicle and numerous varieties of wild grasses grow luxuriantly throughout the district. Thousands of tons of wild hay are cut yearly for home consumption, and large quantities are exported.

## TIMOTHY AND CLOVER

Timothy, clover and bromo grass do exceptionally well and large areas have been seeded to these grasses. A ready market is found for baled hay within the province.

## GRAIN CROPS

The quality of the grain produced in the Leduc district is unexcelled by any grain grown in the world. Large quantities of the very finest wheat, oats and barley are shipped from the district every year. Farmers from eastern Canada and the central and western States, who have come to the district, all agree that it has been impossible in the last fifteen or twenty years to produce plump, well-filled grain on their old farms similar in quality and quantity to that grown here. In yield per acre and weight per bushel Leduc district is second to none.

## LIVE STOCK

Leduc district is pre-eminently adapted to the raising of hogs and cattle for market. It has for its home market the City of Edmonton with its packing plants, stockyards, etc., and is one of the chief contributing districts to that immense industry.

## DAIRYING

In such a district as this, dairying is naturally one of the most important branches of farming. Milk, cream, butter and eggs are shipped in immense quantities. Including the town and district, there are seven or eight cream shipping stations representing the dairy companies of Edmonton, which is in itself ample evidence of the district's importance in this respect.

Notwithstanding the fact that in eastern Canada and the central States land is worth from three to five times as much as here, and all kinds of feed and pasturage cost more, the farmers of Leduc district are being paid more per pound butter-fat than in those older districts.

## SCHOOLS

The school system in Alberta is second to none. The government is assisting the farmers in every possible way along the lines of education. Leduc district is well supplied with schools, so that any farmer locating here has every opportunity of obtaining for his children an education along any line he desires.

## TELEPHONES

Leduc district is well supplied with telephones. Rural lines are being extended every year and the service is excellent. There is also long-distance connection with practically all parts of the province.

## RURAL FREE DELIVERY

Free mail delivery routes extend east and west from the town to the rural parts, with deliveries twice or three times a week.

## ROADS

There has been a great deal of road work done throughout the district during the past few years, and this most important work is receiving more and more attention each year. The district now has an excellent system of roads for automobilizing, the great number of cars now in use by the farmers being the best evidence of this fact.

## VEGETABLES

Vegetables of all kinds, and particularly potatoes, do exceptionally well throughout the district. Potatoes by the car-load are shipped in immense quantities every season, and the yield per acre is nothing short of marvellous to those coming from eastern Canada and other parts. An important point in this connection is the minimum amount of labor necessary to produce potatoes of excellent quality, the rich soil not requiring constant fertilization, and owing to the absence of potato bugs and other insect pests.

An idea of the importance of Leduc as a mixed farming centre can be obtained by a glance at the following figures, which represent the amount of grain, stock, etc., shipped in one season:

WHEAT .....	1,016,910 bushels
OATS AND OTHER GRAINS .....	990,000 bushels
POTATOES .....	92,400 bushels
HOGS .....	7,280 head
CATTLE .....	3,500 head
SHEEP .....	1,000 head
HAY .....	5,000 tons

# ROCKY MOUNTAIN HOUSE

*140 Miles South-West of Edmonton, on the Canadian National Railway*  
URBAN POPULATION, 700; RURAL POPULATION, 3000

The District is called the Sportsman's Paradise. While the main industries of the District are Lumbering and Coal Mining, there are some wonderful opportunities for mixed farming. The District can raise plenty of Grain and Forage Crops, and there is ample Wild Hay and Pasture, with an abundance of good Water.

***There Are Still a Number of Splendid Homesteads Available For Settlers in the District, and the Man Who Will Move In and Go Into Mixed Farming Is Assured of Success In a Few Short Years***

Rocky Mountain House is within easy access of good markets and is close to other good towns of fair size. Rocky Mountain House is a District with high-class Settlers of the English-speaking races; a District where hard work and optimism will reward the farmer and settler with a splendid living and a good home.

**FOR COMPLETE INFORMATION OF THE DISTRICT OF ROCKY MOUNTAIN HOUSE  
WRITE TO THE SECRETARY OF BOARD OF TRADE**

# THE TEENIE WEENIES. THE WORLD'S SMALLEST PEOPLE.

BY  
WM. DONAHEY

The Duncie was greatly excited—he had found a toy rubber balloon, but there was one drawback—it was as flat as a phonograph record—there wasn't a bit of air in it. Now that wouldn't bother most boys or girls, for they would just give one or two blows into it and it would fill up in a jiffy, but a Teenie Weenie wouldn't be able to blow it up in a week.

"I wish I had a whole lot of air so I could blow this balloon up," the Duncie sighed as he looked mournfully at the limp pile of rubber.

"I'll tell you what we can do," said the Clown; "we can take the balloon over to that bicycle we passed a little while ago, and fill it with air from the tire." The Teenie Weenies were so tickled with the idea they gave three cheers for the Clown and hurried over to the wheel.

It was an easy task to remove the cap from the air valve and attach the balloon. The Duncie reached his hand inside the balloon and pressed down the air valve needle and slowly the rubber bag began to fill with air.

"You'd better not get it too full," suggested the Old Soldier.

"Say, this is free air and I'm goin' to get all this tag will hold," answered the Duncie.

• This balloon is goin' to get its fill of air."

The balloon did get its fill of air—it got so full it busted with a tremendous bang and pieces of rubber and Teenie Weenie clothes were scattered all over the landscape. The Duncie never did find his underwear, and Grandpa claims he was wearing his overcoat before the explosion. The Clown swears he lost a tooth and a pocket knife and the Old Soldier is still looking for his wooden leg and his vest.

WILL NOT APPOINT YORATH'S SUCCESSOR FOR FEW MONTHS

LOCAL MAN MAY GET POSITION

City Commissioner Takes Over Management of Northwestern Utilities

TO LEAVE SEPTEMBER 1

David Mitchell, City Controller, Considered to Be Office Candidate

No action will be taken for several months in regard to the appointment of a successor to Mr. Yorath, who is leaving the city for a position in the Northwest Territories. It is believed that Mr. Mitchell, who is now acting as city controller, will be considered for the position.

David Mitchell suggested

According to the contract with the city, Mr. Mitchell will be in the city until September 1, when he will leave for his position in the Northwest Territories. It is believed that Mr. Mitchell will be considered for the position of city controller.

Organization Expert

Since Mr. Mitchell is an expert in organization, it is believed that he will be considered for the position of city controller. He has been in the city for several years and has been successful in his work.

Mr. Yorath in Water

During the last part of his business life, Mr. Yorath has been in the water. He has been successful in his work and has been a valuable asset to the city. It is believed that he will be considered for the position of city controller.

NATIONAL OFFICERS ELECTED FOR CATHOLIC WOMEN'S LEAGUE

Convention Closes After Busy Week—Twenty-five Pounds Sterling Voted to Aid Bethlehem School—Local President Honored by Members

With the election of officers, the convention of the Catholic Women's League of Canada closed after a busy week. The convention was held in the city and was attended by many members. The local president was honored by the members. The convention was a success and the members were very happy.

RIDE 'IM COWBOY!

Pete Vandermere, who was the world's championship at Wembley, coming out of the shutes taking his horse for a ride. He is sure scratching this "Outlaw." Will be kicking the horse into submission! It looks odds on the horse! Vandermere is one of the many cowboys that will provide the thrills at next week's stampede.

TEACHERS WANT GENERAL BELL AND OLD BILL SICK PAY FIXED

Alliance Delegation Waits on Perren Baker to Air Complaints

UNIFORMITY NEEDED

Contract Clauses Will Wait for Closer Attention of Minister

The Hon. Perren B. Baker, Minister of Education, received a delegation of teachers from the city. The delegation was led by Mr. Baker and they discussed the teachers' complaints. The teachers wanted the general bill and the old bill fixed. They also wanted uniformity in the contract clauses. The minister said that he would look into the matter and would report back to them.

CHURCH DIVIDES FIELD OF ENDOAVOR

Western Canada Methodist Dioceses to Come Under Bishop Gaines

The Bishop's council of the African Methodist Episcopal church in Western Canada has decided to divide the church into four episcopal dioceses. The bishop is Mr. Gaines. The dioceses will be under his control. This is a new development for the church in Western Canada.

FAIR VISITORS POUR IN DAILY

Attendance Promises to Exceed That of Any Previous Year

LA GRANDE WILL RIDE

Indian Parades and Exhibits Are Features—Continuous Car Show Planned

With the fair season well started, the attendance promises to exceed that of any previous year. The fair is held in the city and is a great success. There are many exhibits and parades. The attendance is very high and the fair is a great success.

Citizens' League Support

The citizens' league is supporting the fair. They are providing many exhibits and parades. The fair is a great success and the citizens' league is very happy.

Stampede Committee has arranged one of the first programs. The committee is very happy and the fair is a great success.

Heavy rains have fallen in the valley of the Athabasca river. The rains are a great success and the fair is a great success.

**STOEN GO**

Frank Hinesprick is expected back from California this week-end. He is accompanied by Mrs. Hinesprick.

Another episode of Humbuggins has been unfolded, the latest dealer-Snellie & Trudeau.

A new McLaughlin Six was announced Friday. It's a knockout according to George Carson, local sales manager.

Murray Murdoch, Winnipeg's famous hockey player, is in the city, and is assisting his father in selling Bludskader cars.

The price reduction on used cars is approximately seven and a half per cent, and a five per cent decrease on new cars.

George Beale, of Poncha, was a city visitor, Wednesday. He is purchasing a new car from the Pikes River Motor Co.

Dwight Shepherd, motorist in Calgary, is showing the price reduction on used cars.

J. Gault's service station on the Port Road is enjoying a fine business. The roads are all much improved following a heavy downpour Friday night.

Don Phillips and Sparky Tucker moved to the Smoky Lake district, Wednesday. The roads are all much improved following a heavy downpour Friday night.

W. E. Hall, of the Wide West Garage, was formerly with Webster Bros. Calgary and may follow from the Cow Town motor in which he is engaged to buy that Hall is here.

F. Fletcher, who has his firm has several orders booked ahead for the summer months. An order for a car is easily converted into a closed order for the local manufacturer.

H. Peacock, who is the last man around here to get a holiday. He is going to the Hollywood grounds will be gone the time the manager, Louis Munro, returns.

**SKYSCRAPER FOR AUTOS IN CHICAGO**

W. D. Murdoch has returned from a trip through the Chicago district. He reports a very busy condition.

Automobile sales are not as heavy as they were during May and June. Local dealers anticipate a slight lull during the summer.

Annual auto shows under one roof will find two on exhibition at the West Garage. Mr. Murdoch brought them from the north coast.

Mrs. Isabel J. Murdoch, of the Pendleton Motors, holds the distinction of being the first woman to sell an Oldsmobile car in this city.

Local tire houses received information, Friday, to the effect that prices had dropped, which is a pleasant news for the man who has to "take his foot" to the pump.

Alterations at Glue & McLaughlin's garage will soon be finished, which is the pleasure of the mechanic who are engaged in servicing Oldsmobile and Willys-Knight.

Temporary quarters of the Pikes River Motor Co. in the old Hudson garage, rear of Thompson & Byrne's store. A shipment of cars is expected to arrive from Windermere.

Benton Garage on the Port Road is enjoying a fine business. The roads are all much improved following a heavy downpour Friday night.

When Jim McLaughlin brings the Walter Denny, of the James McLaughlin, to the city, he will be as a racing fan, he may well as offer to go in with him.

Ge. H. Hall, of the Motorland, has placed with the Walter Denny, of the James McLaughlin, to the city, he will be as a racing fan, he may well as offer to go in with him.

Milne Sheet Metal Works is having difficulty in supplying the demand for Milne's patent lamin skin for all makes of cars. The equipment for every motorist should have on his car.

Elmer Thompson, of T. H. Deacon, who is the last man around here to get a holiday. He is going to the Hollywood grounds will be gone the time the manager, Louis Munro, returns.

Flowed Dennis and Tommy Cameron, of the Gray Motors, were in the city, Wednesday. The roads are all much improved following a heavy downpour Friday night.

Many motorists are complaining of the number of fuses picked up on the city highways. In some instances, the fuses are not brand new ones. Of course, no person would purposely distribute fuses along the highways to furnish free enjoyment for the motorists.

McLeod's U-Drive Livery has added a few more cars and is now in the fleet of drive yourself cars. The rent-a-car is inaugurated by McLeod Brothers is a new service for Edmonton and will also be appreciated by city visitors, who desire to see the capital city via motor car.

Dempsey was driving a Baby Grand, which he bought, and eventually stopped. Naturally, he was not to take up "residence" in the new building which is now under construction, opposite the Civic Block. Will P. Brown, proprietor, announced yesterday that complete stock of genuine Chevrolet and Ford replacements will be kept. This garage is the only one in the city supplying the authorized agents of that rate mentioned by the Chevrolet Motor Car Company.

London is considering standardizing motor horns.

## Get Hints of Red, Blue, Yellow In Every Room

CRISTONNE IS ONE OF THE BEST HANGINGS FOR A ROOM ESPECIALLY A BEDROOM AS SHOWN HERE BECAUSE IT COMBINES A DIVERSE WHICH BLENDS INTO A BEAUTIFUL COMBINATION OF COLORS.

To be fully satisfied that all three complete harmony and beauty of color in a room, touches of all three primary colors—yellow, red and blue—must be present.

This is the first principle of home furnishing. This life and content of the home depends on it.

But it doesn't mean that just the full yellow, red or blue colors must be used in decorations. There are all sorts of blue, tones, and lines that are derivative of these three—

For instance, orange might be a softer color to use than blue. Yellow or red, it is a combination of equal parts of these primary colors. Then there are innumerable shades of color with yellow or red or blue strain in them that may be substituted.

Blue or red with a greenish blue and red make an admirable combination in a room, and

contains the three primary colors in heart form. Similar combinations may be had with other popular colors or tones of color.

But it should be remembered that if two hues of any kind are used they should be accompanied by the third of the same kind.

Take yellow-orange and blue green. There is a touch of yellow in both colors, which gives a combination of blue and green. This is the secret.

To contrast this superb combination of one color, the third color of the same kind should be used. That is, red and blue, bringing in the third primary color, red, and resulting in a proportionate use of red, yellow and blue.

There is a rule of all other kinds of color. These combinations start with the primary colors of yellow, blue and red and continue with equal quantities of the former toward the secondary, tertiary, and other combinations.

## Garden Practice

There are two classes of insects against which the gardener has constantly to be on guard.

One is the "biting" or "biting" species as they attack the foliage and often the fruit of the plant.

In this class belong potato beet, cabbage worms, most caterpillars and other insects that feed on the foliage.

These insects feed on the foliage of the plant and do not ordinarily damage the fruit. But the preparation must be handled with care as it is a poison.

This can be used only with a common hand-sprayer pump.

The green is also effective in the garden. To prepare it for use, mix one ounce of green with one quart of water and then strain through a square piece of cheesecloth.

Then mix up the four corners of the improved bag thus formed and then pour the mixture over the plants.

After using your mixture be very sure to wash the vegetables thoroughly before use.

For combating sucking insects, rub in a mixture of one part of kerosene and three parts of water.

It is best to use this mixture in the morning or evening, and to use it in the evening to prevent sucking in the night.

When the soil is in the night, it will make a mistake.

Crowding experiments are often in the morning when the soil is in the night.

Don't sprinkle with any device which will cut up the soil.

And after you have finished, be sure to ground to prevent sucking in the night.

When the soil is in the night, it will make a mistake.

Crowding experiments are often in the morning when the soil is in the night.

It is best, at first to use a power of one part of kerosene and three parts of water.

When the soil is in the night, it will make a mistake.

## STOP AND GO

Steady Increase Noted in Numbers Requiring Auto Service

Automotive work of a summer month is being indicated by the increasing volume of business in the automotive industry for examination and repair of electrical units and other more or less intricate tasks of which every motorist occasionally finds himself the victim.

A steady increase in numbers of batteries, ignition, lighting and heating systems, since the first of July is noted by Andy Smith, official local dealer for the Canadian branch of the General Motors Corporation, and general automotive electrician.

Warren F. Vandenberg, of Gray, Campbell Limited, has arranged for an unusually large showing of certified used cars, which will be offered for sale during the summer months. Out of two hundred and thirty cars, a few new cars will be found in good cars at a low price if they get in touch with Vandenberg.

Two Mack Trucks Station has opened on 1814 avenue just west of the McLeod Hotel, with General Corporation in charge.

Warren F. Vandenberg, of Gray, Campbell Limited, has arranged for an unusually large showing of certified used cars, which will be offered for sale during the summer months. Out of two hundred and thirty cars, a few new cars will be found in good cars at a low price if they get in touch with Vandenberg.

Hudson and Essex cars will be exhibited in the automobile building during the exhibition by the local dealer, Freeman Company, Ltd.

Much interest was manifested in the Western Motor Show, which opened in the city on July 10. It is a busy car with a complete line of new cars, and a fine show of used cars. The show is a busy car with a complete line of new cars, and a fine show of used cars.

# Routing Out Crime With Gas Bombs

*How Police of The Country Have Found  
Valued New Ally in Deadly Tear Gas Fumes  
That Choke Desperadoes and Render  
Them Hors de Combat When Rifle Bullets  
Have Proved Unavailing in  
Subduing Them*

A bandit who could not withstand the gas is shown in the sketch. He offered no resistance in the policeman who arrested him.

One policeman, equipped with the new "gas sticks," can more than hold his own with a desperate band of criminals, a single discharge from his miniature hand-mortal being sufficient (temporarily) to strangle the lawbreakers.

A gas bomb, like the one shown at the left, is often sufficient to rout the most desperate of criminals from a building in which he has barricaded himself, prepared to shoot it out with

NOT LONG ago, in the city of Pittsburgh, Police Officer Brown watched with more than usual interest the weaving, staggering figure of a man hurrying along the street. The man was to all intents insane, hurrying out of his path, turning to curse those whom he bumped in his zigzag course. Once he struck at a woman. "That fellow," observed Officer Brown to himself, "is looking for trouble—and he's found it"—then headed diagonally across the street to intercept the man at the corner.

"Stop!" he cried, "I want to talk to you."

The man turned, swaying. He passed stupidly toward the policeman for a moment, then a fever curd his lips, showing his yellow, fanglike teeth. His right hand moved slowly toward his pocket.

It was all over in a moment—just one sudden gesture, then the splutter of an automatic, and the policeman slumped forward as he fell. The slayer ran from the scene of the shooting.

Others came later, drawn by the sounds of the shooting, among them a motorcycle policeman and a fireman. They ran after the man. Hearing the pursuit, he suddenly dodged into the open door of a hotel, summoned the people in the lobby with his gun, then leaped up the stairs.

The policeman and the fireman were right behind him. At the second landing he turned and fired. The fireman fell. The motorcycle man retreated, seeking reinforcements.

By this time the alarm had been sounded and the street was rapidly filling with a restless, excited crowd. Came the sound of bells as the reserve arrived from the police station and the crowd parted to allow the patrol wagon through. The motorcycle man waited at the curb.

There was a hurried consultation. Some of the policemen advocated rushing the room in which the man had barricaded himself. This was tried and the attacking party was met by a fusillade of shots. It withdrew in disorder.

Then guards were stationed to prevent escape and policemen, sharpshooters, were detailed to adjacent roof tops to fire through the windows. Soon pistols were popping on all sides. The crowd scattered only to reform itself a short distance away.

Police lines were established to keep the unruly and the footloose out of danger. By this time more policemen had arrived—every policeman in the town, as a matter of fact—and the siege was on in dead earnest. Commanding officers from a half dozen precincts gathered for a council of war.

This much was known: The man was apparently safely barricaded in the room. He had at least three revolvers and what was apparently an unlimited supply of ammunition. Armed with mon-

itions, he was a raving maniac with but one aim, to sell his life as dearly as possible, to kill as many as he could before he himself was killed.

Some one suggested knocking up the building; others wanted to smother him out.

APPAINTS were at this stage when the chief architect and wife but he brought gas cylinders, filled with waving, noxious vapors, apparatus that had been police equipment for some time; but which had never before been used.

Now, in the emergency, they were to be put to the test. Policemen wheeled with eager curiosity as one of the rounds, around the prospect was fired into the barred of a cell, taken for the moment from the hands of one of the men.

The round, however, was a perfect hit and, as expected, after it was fired, the sound of a bullet striking was heard from the room. The grenade had entered the room.

The first one did not explode properly and was holed back of the police, themselves by the madman, who showed very unusual caution.

The second, however, was a perfect hit and, as expected, after it was fired, the sound of a bullet striking was heard from the room. The grenade had entered the room.

After a few seconds they saw a dim light appearing through the shut in the room. A third grenade, containing three

was the test as the killer, falling in fear of the unknown, lurched through the window and out on the fire-escape, where he collapsed. One arm was over his face; the other was raised, the fingers working madly. He was unarmed.

It was the work of a minute for two policemen to scramble up to the madman's side. He offered no resistance as they half carried, half dragged him down to the street. After a period of minutes, when the effects of the gas started to wear off, he was handcuffed and shackled, and was on his way to police headquarters.

He was unharmed, save for a wound in the shoulder, received early in the fight.

And, what's more, right now he is serving a sentence in the Pennsylvania State Penitentiary, for this is a true story, one of scores revolving around the use of gas to combat crime, the most modern, the most amazing development in society's ceaseless warfare against the human enemy.

GAS, tear-gas, say police officials, is the most efficient weapon ever placed in their hands. Its use is as rapid, and it is always proved effective.

There is not a mob, they say, that will stand up against it. No criminal,

no matter how desperate, can successfully combat it. Time after time such have been reduced to absolute and self submission through its use.

Then, too, it is used as a protector. Devices have been patented and are now being manufactured, sold and successfully operated, which guard valuable more completely than any other method.

banks in all parts of the country, for instance, are installing these devices; they are being installed in jewelry stores, cashiers' cages in great industrial plants; in hotels and storage houses where goods of great value are kept.

Then there are other uses—to protect payroll catchers, for instance, and for installation in industrial plants where labor trouble is feared. For the last named use, a regular gas gun, capable of spreading gas over a vast area, is manufactured.

One use for the gas was recently revealed in Chicago when it was shown that a huge brewery, making and selling an ocean of illegitimate beer, had he sought a confession. It was used on the man.

Instances in which the gas has proved its worth are too numerous to catalog; but here are a few:

In Hinton, W. Va., an insane man injured his father and mother, then killed a deputy sheriff sent to arrest him, mortally wounding another. He held off the State Constabulary for twelve days. But one lone man armed with gas bombs captured him with the use of two grenades.

Thirty foreigners were held at bay and subdued during a riot in a Pennsylvania town, twenty-one of them being arrested by a single policeman.

Another crazed man leaped from a third story in Pittsburgh when a gas bomb was tossed over the transom into his room.

In Chicago a desperado was slain after halting forty policemen at his room. He was routed with tear gas, and in a big Chicago hotel a crazed guest was captured after he had fired dozens of shots through the door at policemen.

And so it goes. In a little Illinois town a tear-gas device trusted safe blowers who had dashed into the bank's vaults, thus releasing the gas and causing them to flee, leaving their tools behind them.

Three bandits were captured in a Indiana town while attempting to rob a bank. They were rendered helpless by the gas.

THE device used in this instance is placed by the window of the teller, bottom is the floor. Other devices include, of course, the grenades, both for use with a rifle and for hand-throwing.

Then there is the chemical protector for safes, so arranged that when the safes are closed, gas is released in such quantities that no one can approach it for ten minutes without being rendered helpless.

Now, too, policemen's maces, or clubs, are equipped with gas cylinders, so that the tear-producing vapor can be loosed

at will and in any direction, having a range of from thirty to fifty feet.

Then there is the heavy type of gas-gun for use against mobs and rioters. There is one use, however, to which the chief will never again put the gas, he had a recalcitrant prisoner from whom he sought a confession. It was used on the man.

"But I'll never do it again," he said. "It was too painful."

The man was not injured, however, as the effect of the gas wears off in from ten to fifteen minutes, leaving no harmful effects at all. On the other hand, a person gassed may carry sufficient of the fumes in his clothing to keep him in an uncomfortable condition for a period of hours.

THE effect of the gas, incidentally, is to blind the victim temporarily, causing him to weep copiously; and at the same time, to sneeze repeatedly. A man in that condition is certainly helpless.

The gas used is chloroacetophenone and it was discovered by former Lieutenant R. B. Lawrence, in charge of gas operations in France during the war. He is now, incidentally, at the head of a concern manufacturing the gas and the devices for spreading it.

"It is absolutely harmless," says the lieutenant, "rendering the victim helpless without causing permanent injury. It is a white vapor, becoming colorless as it mingles with the air; but the gas cloud loses none of its effectiveness in the mixing."

"It is heavier than air and remains within thirty feet of the ground."

A favorite method of demonstration, incidentally, is to "gas" the person or persons to whom the company is trying to sell the gas and its devices.

It has been adopted by the New York, Chicago and Pittsburgh police departments among the larger cities and by hundreds of smaller ones.

It is also made by the Porter Locomotive Works, Pittsburgh; the Pennsylvania Railroad, the New York Central Railroad, live banks in Beaver Falls, Pa.; the National City Bank, New York; the Carnegie Steel Company, the Greenbaum Bank, Chicago, and the Yellow Cab Company, Chicago, as well as by hundreds of other concerns.

"It is as necessary," says Chief Huether, "as fire-breath."

# "Fore!" Cries the Gopher to the Japanese Beetle!

*Pesky Insect Passively  
Opposed While It Ate Its Fill  
of Juicy Fruits and  
Vegetables, but—*

*Wow! What a Riot of Protest  
as Parasites Invade Choice  
Manicured Golf Greens  
of Palatial Country Clubs!*

A closeup  
of the  
Japanese  
beetle

A **FOE** more formidable than the hungriest parasites and the most deadly chemicals at last has appeared to combat the progress of the ravenous Japanese beetle, which has been devastating farms, nurseries, truck patches, gardens, orchards, vineyards and other establishments in New Jersey, Eastern Pennsylvania and Delaware.

While the beetle confined its attention to its appetite to those places which produce the food supply for a large territory and therefore may be regarded as necessary, its progress was obstructed only by such forces as the United States Department of Agriculture's Entomological Department could muster.

As a consequence, the struggle was an unequal one, and the march of the bug into new territories went steadily on at a rate estimated at from five to eight miles a year, eating up profits and obliterating crops. All of this was predicted by the Department of Agriculture after the first beetle was discovered near Riverport, N. J., back in 1916.

Now the beetle itself has done what the Government could not do with all the power of publicity behind it. Having eaten itself out of the farms, it has made the fatal error of invading the sections nearby that men, women and children of America hold sacred to the great god Recreation. It has marched out of the forests, through the "rough" of the golf courses, and onto the velvet putting greens of various country clubs. It has attacked the shade trees and shrubbery and flowers surrounding the immaculate tennis courts, and fed itself on the carefully manicured lawns over which proud and perspiring commuters have found artistic self-expression. And in so doing it has aroused an army of fighters that knows no rest and will give no quarter.

**SO LONG** as the beetle confined itself to mere necessities and so long as its ravages cut only into profits, it was more or less tolerated. The farmers and truck growers swore at it. Some of them also swore at the Government agents enforcing the quarantine. Occasionally they fought, sprayed and made spasmodic attacks against the little brown-green beetle with the colossal appetite, but generally speaking there was no interest sufficient to start a concerted war to the death against the pest.

That was how Loren H. Smith, entomologist in charge of the Department of Agriculture's Experiment Station at Riverport, N. J., had a happy thought. Having determined that the beetle did not feed on more than 200 varieties of growing things, ranging all the way from alfalfa to oak tree foliage, he took a stroll over to the headquarters at the Riverport Country Club and aimed some of the officers if they were having any success with the Japanese beetle. They assured him that they were.

They seemed so sure about the matter that Smith decided to try the matter out for himself. A week later he came back to the club, where the grass had once been so green and was now like an old carpet.

IN THIS SPOT—A SQUARE YARD—DOCTOR

Smith succeeded in finding no fewer than 1500 grubs of the Japanese beetle. The grub or larva is the first stage of the insect. It is hatched out of an egg laid by the full-grown beetle and promptly gets to work on the surface of the green sward, and thus while certain sections of the green were carefully tended and watered, the turf slowly lost its color and the grand old game of golf began to lose a lot of its charm. Members complained. Nerves became frayed. The utmost diplomacy was required of officials to keep everybody in good humor. Word of the discovery by Doctor Smith was widely circulated last year, and as a result it was unanimously decided by all the golfers, tennis players, baseball fans and players, croquet experts, lawn-mower engineers and other commuters of New Jersey that the beetle had gone too far.

The entomologist was invited to bring on his staff and do his worst. Sections of the green were turned over to him for experimental purposes. Volunteers began to call up the Riverport station for advice on the killing of the grubs. Then Mr. Smith had succeeded in making it clear at last that if the grub is killed there will be one less beetle to bother about, and one way of protecting lawns and shrubbery is to knock off the grubs.

A mixture of bisulphide of carbon finally was developed by Mr. Smith after many tests. Small quantities were used at first on small patches of fine green grass, unaffected by the beetle bugs. The effect of this was noticed. When a grub was killed, the grub in growing ground the greenkeeper was to go ahead.

A square yard was marked off at stated distances all over the place, to demonstrate the local treatment. That means of the treatment was prepared. The keeper would keep the grub alive, and the ground was saturated with the chemical.

The fruit grower has waged war on the Oriental pest with deadly vapors, but still the beetle thrives and multiplies

Government experts conducted extensive experiments at the Riverport, N. J., station, hunting for some method of exterminating the Japanese beetle.

In some sections where the bugs were too deeply rooted to be reached by this, greens and fairways were plowed up to bring them to light, and then the earth was dosed. And soon the word went forth that the Epiphyta Japonica, to give the beetle its full Oriental name, was not such a deadly critter after all to persons who didn't mind spending a little time and money on his extinction. The chemical treatment killed from ninety to ninety-five per cent of all the grubs, even where the infestation was thickest.

**AS A CONSEQUENCE** there has been a run on this particular chemical in New Jersey. Price, to most of the purchasers, is no object so long as they have or can raise it. The primary thing is to save the greens so that there will be no further interference with the great American spirit and practice of play. With golfers in the lead, the amateur sportsmen have started a war of extermination that bids fair to succeed or at least to make tremendous progress within a year or two.

By the time this appears in print the first full-fledged beetles will have made

So long as the beetle confined its attention to the consumption of fruits and vegetables, it had a comparatively easy time of it, but the attack on golf greens is in a fair way to prove the death of the bug.

their appearance. The first of them came up about June 15.

But in the meantime the Government will not be idle. It is planned to put nearly five hundred men to work this summer enforcing the quarantine to prevent the "jump" of the beetle by motor truck, pleasure car or freight train over long distances. Nearly all produce and growing things must be inspected to pass out of the area of infestation. Nursery stock can be shipped only when the earth around the roots is shown to be clear of grubs. A single grub, coming to maturity at a point 150 miles distant, might in the succeeding year produce from thirty to sixty eggs, and in the year thereafter another colony would have a good start.

**AND** the Government is not confining its efforts to this merely defensive warfare. A few days ago a carload of earth, in boxes, arrived from Japan. Any one turning up the earth would have found it to be alive with grubs. Each of these is the beginning of a species of fly known as the "Dexilis," one of the most efficient destroyers of Japanese beetles. The earth was shipped from Japan and is estimated to contain at least 50,000 grubs. It is to be put through an incubator process, after which the flies are to be removed to the most severely infested sections.

Another natural foe of the beetle is the wasp known as "Tiphia." Some of these also have been imported. There are various others which in Japan have reached a stage where they keep down the beetle population. Mr. Smith has made arrangements to keep shipments of these counter-pests coming in all during the summer season, and it is hoped by next year that these insects will materially thin out the destructive beetles. The pests are chosen from among many in Japan by experts of the Bureau who have been there for several years. Only such counter-pests are sent to this country as have been found to be safe. In other words, great care is being taken not to bring in any bugs that will become pests in themselves.

# Will the Viking Tame

Daring Norse Nobleman in Whose Arms  
Now Nestles the World's Most  
Restless Butterfly Is Husband  
No. 4—and a Very Brave Swedish  
Count He Is Indeed, With Lots  
of Love but  
No Money!

# the Pretty Peggy?

Peggy Hopkins Joyce, the heart charmer, seems able to hold time at bay

JUST like one of his famous ancestors, a daring Viking of old, the dashing young Count Gosta Morner has braved the blasts and storms that have sent other stalwart men's marital skirts down to destruction, and become the fourth husband of Peggy Joyce.

Why the intrepid Norse nobleman was not dismayed by the shocks and reefs other mariners met in trying to make the port of love and happiness with the winsome but whimsical Peggy, who seems to have based her own life on her first musical comedy success, "It Pays to Play," is beyond the comprehension of all those who have given thought to the matter.

History boasts of many brands of heroes. There was Napoleon, for instance. Horatius at the bridge was surely another. And certainly not ranking far behind him was the boy who stood on the burning deck. It would be hard to tap all the different varieties of heroes the world has known, but on all sides it is being said that certainly added to this roster ought to be the name of the tall, handsome twenty-four-year-old Swedish Count Gosta Morner, who ran into a jewelry store on the Atlantic City Boardwalk the other day, purchased the most significant piece of circular jewelry goldsmiths have yet devised and placed it on the third finger of the left hand of America's most famous institution, her one and only sister—Peggy Hopkins Joyce.

That wedding ring cost exactly \$200. Now, any one who has followed Peggy's record—and who has not—will agree it would take an amazing amount of courage for any young man to fondly imagine he might be the one Romeo of all the world who could supply what Peggy has not yet found in any man but for a poor young man, who, though

of the nobility, is just starting out in a modest business for himself, to attempt to cure this famous and fickle little beauty of her desire to change husbands almost as often as she does dancing partners is, you will agree, as hazardous an undertaking as was ever attempted.

Peggy began life as Marguerite Upton, the daughter of a Virginia barber, who watched her play about, curly-haired and barefooted. Early in her years she began to develop talents for the stage. Since then life has been just one millionaire after another for the little village beauty who at a chance beach dance one night met Everett A. Archibald, millionaire husband, the first with whom she eloped when she was sixteen. Sheborene Hopkins, Jr., Washington society man and representative of great oil and mining interests in Mexico, became millionaire husband the second. She stayed married to him until January 21, 1920.

A little before that date, however, she became acquainted with James Stanley Joyce, the famous Chicago lumber king, whose fortune rolled up to \$40,000,000. She married him two days after she received her latest check.

LATELY now became a writer of diamonds and \$250,000 homes, of sable coats and tires and \$350,000 wrist watches.

The bride of the Viking was one of the flashingly brilliant figures at Deauville, Europe's smartest watering place, and it was the scene of many of her triumphs

But although this newest and richest spouse pampered his little golden butterfly to the tune of \$1,400,000 spent all in one year, he could not begin to hold her love.

In their famous divorce suit fought out in the Chicago courts just a little over a year after the wedding bells rang, five correspondents were named whom she had acquired during their honeymoon together. One of these was the famous Henri Lottelier, millionaire owner of the Paris Journal and of the principal gambling concessions of Europe, including Deauville; consideration of woman's beauty and conceded to the great fascinator of continental Europe.

It would take more pages than there are here available to set down the stories of all the others who became victims

of the irresistible lure this fickle beauty, who rose from a village to the world's centers of art and revelry, had for men who possessed real money. None of her three husbands with all their millions seemed in the least able to steer the Good Ship Peggy away from the alluring dangers that constantly confronted it.

Will Peggy's unsophisticated but daring Viking make port when her three other husbands were obliged to beach their marital craft, call for aid from the U. S. divorce and make the beach in a water of waves?

This is a question which even the kind-hearted and those most anxious to see the little Countess Morner get along in as plucky a fashion as will the Old and the Thrills of the Old World fought

Out on the troubled sea of matrimony sails the intrepid Count Gosta Morner with his capacious bride, Peggy Hopkins Joyce, who already has had three husbands, but now avows she has met, in her Viking lover, "the man to whom I can completely surrender because he is a pal as well as a lover"

added to her crowded and gilded career. Will love in a cottage or, to be more exact, in light housekeeping apartments, satisfy the aching void in this unusual young woman's heart where proud palaces never seemed to be able to turn the trick?

Will the simple life do what hitting the highest and brightest spots on two continents has up to date failed to accomplish? Countess Peggy, daring butterfly, bitterly scored as a violet-eyed spider one dramatic day in a divorce court, has an answer for all these questions herself.

She describes the male ideal that has emerged from her experience of marriage and her countless love affairs as:

"A pal as well as a lover."  
Count Gosta Morner, she explains, is just this type of a man. He did not try to treat her as a pretty trinket he could buy and deck with pretty clothes and jewels, but as a real human being. "A pal," repeats Peggy, "is all the thing. I have finally met the man to whom I can completely surrender. This is my last wedding. I'll settle down and be happy."

Is this then after all the secret of the Peggy personality that has probably furnished the gay capitals of Europe with more libidinal gossip than that of any other young woman who ever passed before the spotlight? Will a pal solve the marriage riddle of the world's most restless butterfly where money, jewels, fine palaces and ceaseless devotion could not?

THE question is worth looking into, for we have it on more than the word of Peggy Hopkins Joyce of late that in any successful marriage the word "like" is far more important than the word "love." Dr. Frank Crane, noted writer and philosopher, treated of this subject in very original and interesting fashion recently when he said:

Like is a stronger word than love. It goes down deeper. It represents the movements of the soul's atoms. It is a subconscious thing more profound than the will or the conscious mind.

Love is something you can indulge in if you choose. But liking is something you cannot help doing. Some men love their wives but they do not like them. Yet this is no true marriage of the sort which brings permanent contentment unless man and wife like each other.

Do Peggy and her Count like each other instead of entertaining some grand illusion of passion? Certain it is the undying passion? Certain it is that he is only twenty-four years old, is of an entirely different type from any other husband with whom she has tried marriage before. Physically he has the appearance of one of those sturdy Vikings, that race of conquerors from which he sprang. He is more than six feet tall, his muscles are like iron, his cheeks by a glowing pink as though lashed whipped a glowing pink as though lashed by the wind and the sea. He is a blond, of course.

In characteristics, too, the Count seems to resemble his doughty ancestors, for did he not desert the castles of his forebears, relinquish what he was of a fortune and come to America to fight out his destiny in this land of promise in as plucky a fashion as will the Old and the Thrills of the Old World fought

their fate out against the elements?

Morner, son of a noted Swedish author and diplomat, lived at half a dozen European courts as a boy. At fifteen he inherited a castle. There he lived for four years. Then a boy love affair sent him off in a chartered tugboat from which he slipped through the Soviet lines and joined the White Army under General Yudenich marching on Petrograd. Yudenich was whipped and Morner scarcely got away with his life. He went back to his castle at Maunshberg and sold it. He put what fortune he had in a trust fund for relatives and came to America with \$100,000, spent it on courses at Columbia University, was reduced to such want that he got a position with the Swedish General Consulate in New York and then went into business for himself. He is at present president of a tonnage manufacturing concern, with offices in Highland Park, Ill., is working extremely hard and is getting along very well.

Peggy herself describes the Count as "suburban." In Chicago he has been living in a little hotel in the outlying districts. He scarcely ever went to town in the evening. When he lived in New York it was the same. The bright spots on Broadway never lured him.

VISITING in the dressing room of famous Peggy in Chicago was perhaps the first taste of stage life Count Gosta ever had. It was in Chicago the couple met where Peggy was sojourning recently as the star of a revue. Though she received many other admirers in her dressing room, the blond Norse nobleman did not seem to have the advantage of any of the others except that he was the representative of another man—a Swedish nobleman whose family, it is said, so seriously objected to an intended alliance with America's champion international heart smasher that they presented him from leaving Sweden for America. It was another John Alden affair.

Four weeks after Morner first called in her dressing room, Peggy, in trim tailored tan suit with a mannish blue silk shirt became a Countess. In Atlantic City the ceremony took place after brief courtship, which was fashioned after the classic outline of the Priestella-Alden romance, Gosta speaking for himself when he had essayed the role of speaking for a friend.

But now the Count Gosta Morner has forgotten all about his friends. The advantages of publicity which nearly except him of his friends. He has taken upon himself to become quite the husband of Peggy Joyce are all but traces in his memory. He never was a bridegroom pelted with such questions. The queries were rather blunt, too, it must be admitted. Did he know of the young children who shot himself to death because of the beautiful young wife to whom he was about to play the role of fourth husband? Did he know that the late de laurel, the Paris dandy? Did the name of U. S. Sturges, son of the famous French laundier, the proprietor of the Albanian throne, of Boston French, New York society man, of Marcella Maudslayi, the daughter of Paris, mean anything to him? Did he by any chance remember the testimony given at the divorce suit from one James Stanley Joyce?

## LOVE—THE GREATEST POWER

**K**OENIGSBERG, known to all editors as the "Syndicate King," has as many corporation names as a centipede has legs or a chameleon colors.

One of the slaves that Koenigsberg drives is named Bruno Lessing—well named—for he has the learning and endurance of Giordano Bruno, who was burned alive without complaining about it, and the wild youthful Oriental enthusiasm of the brilliant Lessing.

Bruno Lessing asks, "What is love?"

Ten thousand people hasten to answer.

Koenigsberg, who is as cold as ice, as wise as many serpents, said to himself, "There's a feature in that." And then he sent around to the old and the young the questions that you shall read here.

### WHAT IS LOVE?

Is the answer the same through the ages,

or—

Does love vary with each generation?

Is love now, after such a climactic event as the World War, different from the love of the days of our fathers and mothers?

Everybody can answer these questions, everybody knows more or less about them, everybody without exception at all, from eight years of age up, has made himself or herself a fool along these general lines. Everybody owes whatever he or she amounts to later to the power that is in religion—spiritual affection or love.

Scientists will tell you that love is Nature's device for improving the race "through natural selection."

And there is something in that.

The Powers above planted man and woman on this earth and put in them the instinct of self-preservation. That kept them alive. But more people were needed, and then biological gravitation was invented, a force like gravity that draws men and women together. It was a great success.

When that started the smoky cave that had been dark and gloomy, suddenly became a beautiful rosy pink. The cave man with his rough, red whiskers, big knuckles, heavy jaw, low forehead, small, squinting eyes, protruding knees, became a thing of beauty an improved foreshadowing of the Apollo Belvidere. As for the lady in the cave, terrible to look upon if you could see her now, with a piece of

The Professors of Princeton College Are Asking: "Which Is the Most Important Word in the English Language?"

The Answer Is That the Word "JUSTICE" Is the Most Important to GOVERNMENT.

And the Word "LOVE" Is the Most Important to HUMAN HAPPINESS.

Love Is the Foundation of All That Is Admirable.

And Love for the Child in the Cradle Is the Foundation of All That Is Most Important and Worth While in All the Love That Has Built Up the Whole World.

auroch's leather around her waist and her matted hair all greasy, she became transformed in her partner's eyes into a regular Little Eva in the transformation scene at the end of "Uncle Tom's Cabin."

Starting out thus, the cave man and lady and their descendants have improved the race a great deal. And that much-abused word "love" has done it all.

"Does love vary with each generation?" Certainly not. When the father of Leonardo de Vinci met the peasant girl that became Leonardo's mother, her emotion was the same as that of Villon's "Bertha with the big feet," when she met Charlemagne's father and they agreed to get married.

And her emotion was the same as that of the little Normandy girl, the daughter of a tanner, who became the mother of William the Conqueror, after her good looks had been observed by the Duke of Normandy riding by with his soldiers, where she was washing clothes in a brook.

Poor Heloise, sighing for the unworthy Abelard, felt just exactly like a poor little modern girl with her hair bobbed, lending all the qualities of Jupiter, Mars and Mercury to some little lounge lizard with a concave chest.

Love doesn't change, of course, with each generation, or with each century, or each hundred thousand years.

It is a steady force, endeavoring, and most successfully, to make us better than we were before. Mr. Koenigsberg's third question is answered by the answers to the second.

The love that he and the learned and fervent Bruno Lessing have in mind isn't really the IMPORTANT love.

The love of a mother for her baby, the love of a son for his father, the love of the scientific man for holy TRUTH, the love of self-sacrificing men and

women for liberty and for country, the love of a great genius for the stars and their beauty, all these are far more important than the love that is based upon individual attraction, although that is a very fine and helpful thing also.

There are the answers to your three questions, cold as ice Koenigsberg. Let those that would have other answers read the newspapers that publish articles from the "King Features Syndicate."

Read some of the hundreds of answers that Mr. Koenigsberg will print and you will be much interested to find what extremely poor and aimless answers otherwise very intelligent human beings can give.

One man answers: "My version of love is a sunshine cocktail." That's silly. You don't need to know the rest of the answer.

Another replies: "Love is a feverish insanity." That doesn't mean much, either.

"Caring for someone more than for yourself" is not very brilliant, but it's a better answer.

"Love is a spark from the Infinite Eternal, transfusing and illuminating the heart of man." A harmless generalization, not meaning anything.

"Love is the exquisite pattern men and women weave upon the woof of life"—another harmless nothing.

Other men of bigger calibre have answered more ably and interestingly Mr. Koenigsberg's question, "What is love?"

Mazzini, the great Italian, called love the "Religion of Humanity."

Littleton wrote: "Love can hope, where reason would despair."

La Rouchefoucauld, who wrote more good short things than anybody else, said: "The greatest miracle of love is to eradicate flirtation."

How can you tell if you are in love?

That solemn Frenchman, Pascal, wrote: "If a man loves a woman for her beauty, does he love her? No; for the smallpox which destroys her beauty without killing her causes his love to cease. And if any one loves me for my judgment or my memory, does he really love me? No; for I can lose these qualities without ceasing to be."

Byron said of love that it was "indeed light from Heaven, a spark of that immortal fire with angels shared; by Allah given, to lift from earth our low desire."

One thing is sure, unless what you call "love" is an emotion that makes you a hundred times better than you were before, you have chosen the wrong word to describe your emotion.

Cervantes, who invented Don Quixote and Sancho Panza, says: "The darts of love are blunted by maiden modesty." Like many others of the Latin race, he looked upon love as a commodity, and was not a good judge.

Mme. de Stael, a very plain lady with a great deal of intelligence, had a better definition: "Love is the emblem of eternity; it confounds all notion of time; effaces all memory of a beginning, all fear of an end."

Alfred de Musset, one of those that knew George Sand very well, wrote: "Life is a sleep, love a dream; and you have lived if you have loved." He wrote a great deal of trash on that subject.

About the worst idea of love ever expressed by anybody was contributed to the world by that solemn person, Martin Luther. He thought a lady ought to stay in the kitchen and looked upon her as he did upon any other piece of household furniture. Some men begin quite romantically to end on the Martin Luther basis.

Byron expressed in poetry the unpleasant truth that women take love more seriously than men. He writes, putting his criticism in the mouth of a lady:

"Man's love is of man's life a thing apart,  
This woman's whole existence; man may range  
The court, camp, church, vessel and the mart,  
Sword, gown, gain glory, offer in exchange;  
Pride, fame, ambition, to fill up his heart;  
And few there are whom these cannot estrange;  
Men have all these resources, we but one—  
To love again, and be again undone."

Thus you could go on forever. For every man that ever wrote probably has written something about love, if only like the old Puritans and the early fathers, to discredit and abuse it.

But this remember—of all the love in the world, of all the emotions of which human beings are capable, the most important to the world's welfare and to the happiness of woman is shown in this picture by Mr. McCay. Here in the cradle lies the true affection upon which a mother may rely and by which the worst father may be reformed, if there is any reform in him.

# Is Antioch Cup the Long Sought Holy Grail?

**Silver Chalice Dug Up by Arabs Near Jerusalem and Now in New York Bank Vault Said to Be Same From Which the Saviour Drank at the Last Supper**

The Great Chalice of Antioch, which many antiquarians now believe to be the Holy Grail and for which the Crusaders sought in vain, is now in a safety deposit vault in New York City

The "Last Supper," by Leonardo da Vinci depicts Christ at the time tradition says He drank from the Holy Grail

OUT of the golden mists of legend and into the most sophisticated and materialistic city in the world comes a relic of Christianity, which archeologists declare may be the cup touched by the lips of Christ at the Last Supper. There are those who say the Holy Grail is in a safe deposit box in New York City.

So many wars, so many controversies and old traditions have had the Holy Grail as their source that this modern, bustling age had long ago assigned the precious cup to the realm of things that had been lost forever. In the Middle Ages, the quest of the Grail was a very real thing, a thing to which knights dedicated themselves, and for which kings and emperors conducted crusades against the pagan in the Holy Land.

But for all the fluttering harness and the clash of the oft-repeated crusades, nobody saw the Holy cup itself. Here and there men heard of it, once it was said to have been stolen from Jerusalem by a Roman emperor.

To most of the world, however, this cup, in which at the Last Supper Christ administered the sacrament of His blood, was a mere story from an older time, the faintest echo of tradition—the amplified and garbled narrative of a cup—precious, indeed, by the light of later events—which had been lost in the confusion and terror of the tragedies leading to the crucifixion.

Yet the fragmentary histories of the early fathers insist that some one removed the cup from the table soon after the Last Supper was done and treasured it as a memento of the Master. Between the old anecdote and the present there stretches a span of almost twenty centuries.

Even those who in the absence of further proof, which may turn up any day, still refrain from calling this the Grail, nevertheless concede that this chalice is among the most beautiful of antiquities and undoubtedly a precious object of the very early Christian Church. That further proof may turn up at any moment to the reasonable belief of the people who now have the chalice in charge, for since the recent publication of a two-volume treatise on the chalice by Dr. Gustave A. Eichen, of New York, antiquarians all over the world have begun to pore once again over ancient Church records. It seems improbable that any scrap of information about the Grail will remain hidden long.

THE cup in the New York bank vault is eight inches tall. It is indeed, a cup within a cup; the inner vessel being the precious relic and the outer being its protective shell. Both outer and inner vessels are of silver. The inner cup, which is compressed as if from a blow, is of the chalice, worn and stained. Made from a sheet of hammered silver, its rim is turned over in "roll" shape, and down center closely as if perhaps the arms of a cross. There is no decoration.

The outside vessel, on the other hand, is elaborately carved with an intricate design, each unit of which is beautifully filled in the white metal. Hindu, Arab and various other religious symbols are in the design; but the chief carving shows Christ surrounded by the apostles. On one side of the chalice the Saviour is represented in His youth; on

St. Jude is shown in the above detail of the chalice

Many supernatural incidents and mysterious happenings occurred during the Crusades in quest of the Holy Grail, but none is more picturesque than the one reproduced from a Dutch drawing. The Crusaders, disheartened and thrown back, are on the verge of disorder when an apparition appears on the Mount of Olives. A knight, in armor that shone with a gleam that was not of earth, sword high-held, waves the Crusaders forward, and in him many think they see St. George and the attack is renewed with increased vigor.

the other as a man of mature years. The fact that the inner, somewhat roughly-molded cup has been preserved in such a state is remarkable.

The discovery of the chalice and its journey to New York was as simple, and not as dramatic, as a New Testament miracle. In the town which stands where Jerusalem once stood, the Jews found a little case of bottled

treasure, some book covers, an altar cross, six objects in all, and a carved cup.

Near the site of Antioch lived an agent of Kouchaki Freres, dealers in antiquities, who have offices in Paris and New York. Recognizing the chalice as a beautiful antique, the dealers bought it and sent it to Paris to be cleaned.

Here came the first proof of its great age. The silver had oxidized, and a certain crystallizing process had taken place. The compressed inner cup, for example, could not be straightened be-

cause the crystallization had occurred after the injury had been sustained. When the simplicity of the inner cup was contrasted with the splendor of its enclosing and protective vessels, Eichen Kouchaki, a keen authority on both ordinary antiquities and relics of the early Church, was struck by the thought that here might be the cup of the Last Supper.

He did not rely on his own judgment alone. He consulted experts in many lands, and in America asked the opinion of Prof. Gustav Eichen, who was formerly curator of the California Academy of Science, Berne nine years.

Dr. Eichen has studied the cup, giving it an intensive study which has, perhaps been bestowed on no other relic. After nine years of painstaking research, he has just published his volume on "The Great Chalice of Antioch." In this work he assigns the chalice to the earliest period of the Christian Church, and implies that it is indeed the Grail. Dr. Eichen does not actually pronounce this the Grail—he is too careful an antiquarian for that. But he does pronounce it a work which dates from the actual time of Christ, and obviously a

relic of the most precious character. What else could it be but the cup of the Last Supper? asked Eichen Kouchaki the other day. A Syrian, familiar with the Antioch site, he sat in his gallery at 707 Fifth avenue, surrounded by ancient pottery and dim, old frescoes from crumbled edifices. Outside the window, the sleek hum and rattle of Fifth avenue went hurrying past. In here all was quiet, all was old, all was a very fit setting for talk about the Holy Grail. "I am not even sure," said Eichen Kouchaki, "whether it was best for us to buy the cup. We paid a very large sum for it, and for nine years I have done almost nothing but study it and take care of it."

The above detail of the chalice shows St. Peter

Given that age, and the unusual circumstance of enclosing a plain, rough cup in a magnificent holder, the Antioch chalice seems more than ever likely to be the apparent relic for which the quest of the Holy Grail was carried on.

From Antioch to New York, however, the chalice had the dramatic misfortunes which usually befall a sacred relic of a faith beset by powerful enemies. In his book, Dr. Eichen says the spot on which the Arabs dug up the chalice and the cache of sacred objects was probably the spot on which they had been buried during the reign of Julian the Apostate. Julian closed the basilica of Constantine in Antioch, stole its wealth, and had its treasurer—Theodoretus—tortured and beheaded for his refusal to reveal the whereabouts of some object of great importance. In spite of the treasurer's silence, some of the sacred vessels were found and thrown on the ground with great violence. Does this perhaps explain the compression in the side of the chalice? Later these objects—the chalice probably among them—were sent to Constantinople. Still later they were returned to Antioch.

Dr. EICHEN suggests that perhaps the chalice was buried again in 514 or 614 A. D., when the church was again oppressed. If so, this is why it was buried with Byzantine objects of art, like the book covers. Even after its removal to Paris, the cup was again endangered. When the Germans made their drive against the French capital, the cup was brought to America for safe keeping.

A study of the cup does a strange thing to the student. It brings the Saviour and His Apostles very near to these hurrying days in which we live. The young Christ, holding the book of the New Law, has a broad forehead, an intelligent face. Christ, the man, who holds an open scroll of the Law, is permeated with delicate features, not distinctly Semitic; a wide forehead, and a smooth, and His hair is short. He is robed in a toga such as emperors wore. It is the age-long search for the Holy Grail ended—in New York?

# Countess Alice Shoots Just in the Nick of Time!

*New First Lady of South Africa Saves Her Husband, the Earl of Athlone, From Being Gored by Infuriated Hartebeest as Wounded Animal Charges With Lowered Horns*

BRITAIN is still a-thrill over the heroic deed of beautiful Princess Alice, Countess of Athlone, who, on a hunting trip in the heart of the Transvaal, stood between an infuriated bull hartebeest and her husband, whom the beast was endeavoring to gore to death, took swift aim with her rifle and put an end to his fit of rage with a bullet.

Her heroism, dramatically enough, just followed that of the Earl himself, who a few seconds before had hurled his wife from the path of the infuriated animal, only to have him leap in great frenzy on himself.

The Earl of Athlone is the Governor General of South Africa and the youngest and favorite brother of Queen Mary. His popular wife is the granddaughter of Queen Victoria, daughter of the late Queen's youngest son, the Duke of Albany. She is the mother of Lady Mary Cambridge, still mentioned as the British beauty who might yet be picked by the Prince of Wales for his bride. The recent movement in the British aristocracy to capture rare specimens for the empire's great museum prompted this famous couple to penetrate untraveled places of the Transvaal on their hunting expedition, and has yielded this tale of bravery which matches those told of women in lowlier places whom fortune has not surrounded by the softening, enervating influences of ermine and purple.

IT IS NOT given to every wife to have the opportunity of saving her husband's life. Only once in an aeon comes into a woman's existence that moment when, in a swift, desperate moment of panic, she must choose between escaping with her own life or remaining to gamble desperately with fate and fight for the life of one she loves. That, however, is just the problem Princess Alice, regarded by many as the most beautiful and charming member of the reigning house of England, faced. How she solved her terrifying dilemma will be the talk of London drawing rooms for many a day to come. For not only did the brave Countess meet the situation in valiant fashion; she met it in a woman's way!

If Lord and Lady Athlone never held the prominent official place they do in the political scheme of the British Empire, they would still be outstanding personalities of their homeland. There is a certain aura of picturesque and good sportsmanship about them both that cannot be denied. In the first place, the

Earl of Athlone wasn't always an Earl. He used to be Prince. But the conduct of a remote relative, one William Ho-

henzollern, caused him to make up his mind to drop what he considered the vague, useless Wurttemberg title of Prince of Teck. This he dropped in 1917, when other Teuton titles adorning British subjects were brushed out of existence.

The King created him Earl of Athlone, but he could no longer be called "your highness" or, in fact, even "sir." Princess Alice, of course, remained a royal highness, but the difference in stations between her husband and herself never mattered in the least. As well as being beautiful, the Countess of Athlone is extremely sunny tempered and filled with a joy of living that transcends mere titles and honors. It was just before the World War the Earl was scheduled to become Governor General of the great Dominion of Canada, and many another woman would have been wretchedly disappointed to have fate step in and spoil this wonderful plan. Princess Alice took it all in splendid part and gave herself wholly to sending her husband off to the great war, where he spent four years.

It was only last fall the elder brother of Queen Mary and his wife, a worthy granddaughter of Queen Victoria, were sent to South Africa to preside over the fortunes of that autonomous union. Both of them are ardent sportsmen at home, so it is little wonder that hunting in the wild stretches of the Transvaal became one of the chief diversions of having been sent to a far-off post in spasmodically civil-

With the Earl of Athlone, Governor General of South Africa, who is shown in the circle, the Countess Alice roams the wide, wild places of the once "Dark Continent," encountering adventures that would cause the bravest of men to tremble

What Princess Alice saw next with horror-stricken eyes was a great enraged beast, with horns and sharp hoofs, charging down upon her wounded husband.

With a woman's wit she screamed shrilly, and in that instant the beast paused and raised its head. A flash, the crack of a revolver and the hartebeest fell dead under the unerring aim of Countess Alice.

The Earl of Athlone and his Countess have won hearts on all sides of their new post in South Africa. In the first place, even though they have an exquisite debauched daughter, Lady Mary Cambridge, and a tall strapping of a son, Viscount

Frederation, they both seem as much in love with each other as when they first went honeymooning. Lord Athlone is a tall soldierly man who has inherited the good looks of his father and also of his mother, the universally beloved Princess "Polly" of Cambridge, who in her youth was considered one of the handsomest Princesses of Europe.

If Lady Athlone had met a lion instead of an antelope in this adventure of hers on the Transvaal, her neighbors in her South African home are perfectly sure she would have measured up to the situation just the same. The clouded ignorance that terrified-looking giant lizard recently sent to the British Museum by some explorer, would have probably met a like fate at her hands.

and the Princess advanced cautiously to the place where the antelope had fallen. Nearer and nearer they came. They were almost on him—a woman's scream echoed through the forest. Quicker than it takes to tell, the hartebeest had jumped to his feet. He was charging toward the humans who had dared to wound him. With fury he hunched his four feet, as is the custom of the antelope. Through the air he leaped like a living javelin ready to stab. Were it not for the quick action of the Earl he would have landed on the Princess Alice. Athlone literally threw her into the brush. He leaped to follow, but he was not quick enough for the infuriated animal.

What Princess Alice saw next with horror-stricken eyes was a great, enraged beast, a seeming tangle of horns and sharp hoofs, charging to gore her husband to death.

Reason functions mechanically in life's most fearful moments. The Princess knew if she fired a shot she was apt to kill her husband. She used a shrilly to divert the attention of the infuriated animal. Quickly he snapped up his head in a listening attitude. A second and different sort of cry brought him clear of his intended victim. A flash, the report of a revolver. The hartebeest fell dead of a revolver. Princess Alice had won in her struggle with fate by giving up all thought of saving herself to pludge her whole life on saving that of her husband.

so few of us ever have the privilege of seeing. As usual, soon the Earl and his slim, pretty wife were far ahead of the others.

The hartebeest of South Africa is today so common sight. It is, of course, not a rare specimen to be exhibited, but this large African antelope that once roamed the plains in great herds belongs to a race that is dying out, and to be able to bag one of the family is considered quite a feat.

It was the Princess Alice's bright eyes that spied the hartebeest first. She saw the ringed, compressed nose that seemed ready to snort, the short cow-like tail that somehow presaged danger. But, above all, her eyes fixed on the heavily ridged, wild, divergent horns for which the hartebeest is famous. They could gore a human being to death in a minute.

There was the crackle of brush. Before either the Count or Countess had a chance to aim, off the hartebeest bounded into the wood. Now, it is known this African antelope is built for speed. He is indeed faster than a greyhound, so it can be readily imagined the Earl and his wife, the Princess, had no easy time in the hour of stalking that followed.

Then suddenly they spied their quarry standing. The quick crack of the Earl's rifle resounded in the wood. The hartebeest staggered, careened and fell to the ground. He lay perfectly still. "Get him," said the Earl, and, jubilant over bagging this big game at last, he

The hunt for rare specimens for England's great museum sent the Earl and the Countess on the journey that came so near ending in a tragedy

freed South Africa. What added to much to the zest of it was the fact that so many Britishers wandering on the outskirts of the earth were making special efforts to send back rare specimens to the museums, and one could never tell just what thrilling moment would yield a stranger specimen than had ever yet been put into captivity.

The sun shone brightly on the recent day the Earl and Princess Alice, with a party of kindred souls, started on the hunting trip at Messina in the Transvaal that was nearly to cost the Earl's life. Nothing presaged disaster as the party partly started for the far-off wild gardens of the earth.
